The following Degrees and Licences in Medicine and Surgery are granted by the University of Dublin, in conformity with the Charter of Elizabeth, and are entitled to be registered under the Medical Act:—(1.) Bachelor in Medicine; (2.) Doctor in Medicine; (3.) Master in Surgery; (4.) Licentiate in Medicine; (5.) Licentiate in Surgery. The qualifications requisite for these Licences and Degrees are the following:—

I.—BACHELOR IN MEDICINE.

Qualification in Arts.—The Bachelor in Medicine must be a Bachelor in Arts of Oxford, Cambridge, or Dublin.

Qualification in Medicine.—Four years, at least, spent in the study of Medicine, including the following Courses of Lectures:—1. Anatomy and Physiology; 2. Practical Anatomy; 3. Surgery; 4. Chemistry; 5. Materia Medica and Pharmacy; 6. Institutes of Medicine and Pathology; 7. Practice of Medicine; 8. Midwifery; each of these Eight Courses is of six months' duration. 9. Botany; 10. Practical Chemistry; 11. Medical Jurisprudence; each of these Courses is of three months' duration. 12. Nine months' attendance on the Clinical Instruction given in the Hospital of Sir Patrick Dun. 13. Nine months' attendance on the Clinical Instruction of any Medico-Chirurgical Hospital approved by the Board of Trinity College.

After the completion of the foregoing Courses, the Candidate for the Degree of Bachelor in Medicine must pass a public Examination, of, at least, two days' duration, partly written and partly oral.

The Certificates of Lecturers in the following Schools are recognized by the University of Dublin:—The School of Physic, Trinity College; the School of the College of Surgeons; the Richmond Hospital, or Carmichael School; the Steevens' Hospital School; the Ledwich, or Peter-street School; the School of the Catholic University.

The following Medico-Chirurgical Hospitals are recognized by the University of Dublin:—Hospitals of the House of Industry (Richmond, Whitworth, and Hardwicke); Mercer's Hospital; The City of Dublin Hospital; St Vincent's Hospital; The Meath Hospital and County of Dublin Infirmary; Jervis-street Infirmary; Dr. Steevens' Hospital; the Adelaide Hospital.

The Lectures of the Professors of the School of Trinity College are recognized by the Royal College of Surgeons of Ireland, by the King and Queen's College of Physicians, and by all the other Licensing Corporations in the United Kingdom.

II.—DOCTOR IN MEDICINE.

Qualification in Arts.—The Doctor in Medicine must be a Bachelor of Arts of three years' standing.

Qualification in Medicine.—The Doctor in Medicine requires no qualification in medicine, additional to that necessary for the Bachelor in Medicine.

III.—MASTER IN SURGERY.

Qualification in Arts.—The Master in Surgery must be a Bachelor of Arts.

Qualification in Surgery.—Four years' study of Surgery, and attendance on the following Courses:—1. Anatomy and Physiology, Two Courses, each of six months. 2. Theory and Practice of Surgery, Two Courses, each of six months. 3. Demonstrations and Dissections, Three Courses, each of six months. 4. Practice of Medicine, One Course, of six months' duration. 5. Chemistry, One Course, of six months' duration. 6. Materia Medica, One Course, of six months' duration. 7. Midwifery, One Course, of six months' duration. 8. Practical Chemistry, One Course, of three months' duration.

9. Botany, One Course, of three months' duration. 10. Medical Jurisprudence, One Course, of three months' duration. 11. Attendance on the Clinical Instruction of three Sessions, of nine months each, in any of the recognised Medico-Chirurgical Hospitals.

Having completed the foregoing Courses, the Candidate for this Degree must pass a public Examination of two days' duration, partly written and partly oral.

IV.—LICENTIATE IN MEDICINE.

Qualification in Arts.—The Licentiate in Medicine must have kept one full year in Arts.

Qualification in Medicine.—Same as the qualification for the Degree of Bachelor in Medicine,—viz., attendance on the prescribed Courses of instruction, and the passing of a similar public Examination.

V.—LICENTIATE IN SURGERY.

Qualification in Arts.—The Licentiate in Surgery must have kept one full year in Arts.

Qualification in Surgery.—Same as for the Degree of Master in Surgery,—viz., attendance on the prescribed Courses of instruction, and the passing of a similar public Examination.

The Licences in Medicine and Surgery of the University of Dublin are recognised by the Boards of Examiners of the Navy, Army, and East Indian Army, and entitle the holder to register under the provisions of the Medical Act of 1858.

PRIVILEGES OF MATRICULATED MEDICAL STUDENTS.

The Medical Library at Sir Patrick Dun's Hospital is open on Tuesdays and Fridays, at two o'clock, for the delivery of books to Students, conformably with the regulations of the College of Physicians.

The College Herbarium is open to the public on Wednesdays and Fridays during Term, from 11 to 2 o'clock. Any person desirous of verifying specimens may obtain admission on Tuesdays and Thursdays, during the same hours, by giving notice to the Curator.

The Botanic Gardens of the University are also open to Matriculated Students.

Medical Students, being Junior or Senior Sophisters on the College Books, and in attendance on two of the winter courses of Medical Lectures, are exempted from the Classics of the Junior Sophister year, and from one of the three optional Courses (Mathematical Physics, Experimental Physics, or Classics) of the Senior Sophister year. To obtain this privilege it is necessary that the Student be matriculated in Medicine, and that the proper certificates of his attendance on Medical Lectures be submitted to the Senior Lecturer.

Students in Arts who are also matriculated in Medicine, having their names on the College Books, will be permitted to attend one Course free of expense, with each of the University Professors.

No Testimonium, or Certificate of Attendance, will be issued to such Students until after they have proceeded to their first degree of Medicine. On their application for the *Liceat ad Examinandum*, the Professors will transmit, direct to the Registrar of the School of Physic, the names of those Students who have qualified themselves. Should the Student who has had the privilege of free attendance desire to obtain an official Testimonium, before proceeding to his Medical degree, he must, on obtaining it, pay to the Professor the usual fee.

By the Act, 40 Geo. III., c. 84, the several Lecturers and Professors of the School of Physic are bound during each Medical Session to return to the Senior Lecturer the names of such Students as have attended their Lectures.

FEES.

Entrance Fee, including first half-year, 15*l.*: Second half-year, 8*l.* 8*s.*; Fee on Licence, 2*l.* 10*s.* Total Fees, 25*l.* 18*s.*

The Candidates for the Medical and Surgical Licences of the University of Dublin are subject to the College discipline during their Course in Arts.

QUEEN'S UNIVERSITY IN IRELAND.

EXAMINERS FOR THE YEAR.—*Chem.*: Wm. Barker, M.D. *Zool. and Bot.*: Prof. G. Dickie, M.D. *Anat. and Phys.*: Prof. C. C. King, M.D. *Med.*: Samuel Gordon, M.D. *Surg.*: W. Colles, M.B. *Mat. Med.*: Mr. R. Macnamara. *Midw.*: Prof. F. Churchill, M.D. *Nat. Philos.*: Prof. J. England, M.A. *Mod. Lang.*: Prof. M. Frings, Ph. D. *Sec.*: G. J. Stoney, M.A.

Each Candidate for the Degree of Doctor in Medicine is required—1. To have been admitted a Matriculated Student of one of the Colleges of the Queen's University in the Faculty of Medicine. 2. To have attended, in one of the Queen's Colleges, lectures on one Modern Language for six months, and lectures on Natural Philosophy for six months. 3. To have also attended at least one-third of the Courses of Medical lectures enumerated below, in some one of the Queen's Colleges. For the remainder of the Courses, authenticated Certificates will be received from the Professors or Lecturers in Universities, Colleges, or Schools, recognised by the Senate of the Queen's University in Ireland.

4. To pass two University Examinations. The Curriculum shall extend over a period of at least four years, and shall be divided into periods of at least two years each. The first period shall comprise attendance on the following Courses of Medical Lectures:—Chemistry,—six months, at least three Lectures each week. Botany and Zoology,—six months, three lectures each week, with Herborizations for practical study. Anatomy and Physiology,—six months, five lectures each week. Practical Anatomy (comprising attendance on Anatomical Demonstrations, accompanied by dissections made by the student)—six months. Materia Medica and Pharmacy,—six months, three lectures each week. The second period shall comprise attendance on the following Courses of Medical Lectures:—Anatomy and Physiology,—six months, five lectures each week. Practical Anatomy (comprising attendance on Anatomical Demonstrations, accompanied by dissections made by the Student)—six months. Theory and Practice of Surgery,—six months, three lectures each week. Midwifery and Diseases of Women and Children,—six months, three lectures each week. Theory and Practice of Medicine,—six months, three lectures each week. Medical Jurisprudence.—three months, three lectures each week. In addition to the above Courses of Lectures, candidates shall have attended, Modern Continental Languages (in one of the Colleges of the University)—six months. Natural Philosophy (in one of the Colleges of the University)—six months. Also, during the first period—Practical Chemistry (in a recognised Laboratory),—three months. Medico-Chirurgical Hospital (recognised by the Senate), containing at least sixty beds; together with the Clinical Lectures therein delivered, at least two each week,—six months. And during the second period,—Practical Midwifery, at a recognised Midwifery Hospital, with the Clinical Lectures therein delivered, for a period of three months, in an hospital containing not less than thirty beds; or six months in an hospital containing not less than fifteen beds. Practical Pharmacy,—three months. Medico-Chirurgical Hospital (recognised by the Senate), containing at least sixty beds; together with the Clinical Lectures therein delivered,—eighteen months.

For attendance on Practical Pharmacy the candidate shall produce evidence of his having been engaged for the time specified in compounding medicine, either in the establishment of a legally-qualified apothecary, or in the compounding department of some hospital recognised by the Senate, under the superintendence of the Apothecary of the institution.

FIRST MEDICAL EXAMINATION.

The First Medical Examination may be passed either in June or September. It is competent for students to present themselves for their first examination at the termination of the first period of the Curriculum, or at any subsequent period. Before being admitted to examination, each candidate must produce satisfactory evidence of having completed the course prescribed for the first period of the Curriculum.

The First Medical Examination comprises the subjects of the first period of the Curriculum, along with which candidates may present themselves for examination in Natural Philosophy and Modern Languages, if they have already attended, in one of the Queen's Colleges, the prescribed courses on these subjects.

The examinations will be conducted principally by printed papers, to which written answers shall be given, but the examiners shall also be at liberty to add such *vivâ voce* examination on the subjects of the written papers, and to call for such demonstrations and experiments as they may deem necessary. It is the duty of each of the Examiners in the first and final medical examinations to report to the Senate such deficiencies in English composition, as in his opinion ought to disqualify candidates for University degrees.

FINAL MEDICAL EXAMINATION.

Examinations for the degree of M.D. are held in June and September. The fee for the degree of M.D. is 5*l*. Each candidate must be recommended by the President of his College, and produce certificates to the following effect:—1. A certificate from the Secretary of the Queen's University, that he has passed the first Medical Examination, unless the candidate present himself for both examinations simultaneously. 2. From the Council of his College, that he has passed a full examination in the subjects of study prescribed in the course of Matriculation for Arts, and has been admitted a Matriculated student of the College in the Faculty of Medicine. 3. That he had attended in some one of the Queen's Colleges one-third of the Medical Courses enumerated above, Lectures on one Modern Language for six months, and Lectures on Natural Philosophy for six months. 4. Certificates that he has completed all the Courses prescribed for the second period of Medical study.

The final Medical Examination comprises the subjects of the second period of Medical Education, along with Natural Philosophy and one Modern Language, unless an examination in these subjects have been passed at the first Medical Examination.

The examinations will be conducted principally by printed papers, to which written answers shall be given, but the Examiners are at liberty to add such *vivâ voce* examination on the subjects of the written papers, and to call for such demonstrations and experiments as they may deem necessary.

The above regulations are binding on all Students who have commenced their Medical Studies since the 30th of September, 1852; but students at that time engaged in their Medical Studies are at liberty either to complete their courses according to the present regulations, or according to those of an older ordinance, which may be learned by applying to the Secretary.

REGULATIONS AS TO THE RECEPTION OF CERTIFICATES FROM MEDICAL LECTURERS AND HOSPITALS.

1. Colleges or Schools seeking recognition from the Queen's University, are requested to send in the name and qualification of the several Lecturers whose lectures are required to be recognised, with such particulars as the Senate may require. And in the event of the Lecturers being changed, a fresh recognition must be sought. 2. All Lecturers, and Clinical Lecturers, without exception, must transmit to the Secretary, on every 25th November and 1st May, or as often as required, a return filled up according to a form transmitted, of the Students in attendance upon such Lectures or Hospital Practice. The certificates of Lecturers not complying with this regulation will not be recognised.

Students who intend to present themselves for examination for Medical Degrees in the Queen's University should ascertain that their names are returned for any Medical Lectures they may attend, lest, in consequence of such returns not having been supplied, their qualifications should be deemed insufficient when they so present themselves; and Lecturers who are willing to make the required returns, and who have not received the necessary forms through the Registrars of their respective Institutions, should cause application to be made for them.

KING AND QUEEN'S COLLEGE OF PHYSICIANS IN IRELAND.

Visitors.—Lord High Chancellor of Ireland; Lord Chief Justice Queen's Bench; Lord Chief Justice Common Pleas; Chief Baron Exchequer.

Pres.—D. J. Corrigan. *Vice-Pres.*—Dr. J. M. Neligan. *Censors*—Drs. J. M. Neligan, E. B. Sinclair, J. F. Duncan, and D. W. Barker. *Treas.*—Dr. H. L. Dwyer. *Libr.*—Dr. G. A. THE COLLEGE OF PHYSICIANS IN DUBLIN was founded in 1660 by Dr. JOHN STEARNE, Fellow and Professor of Physic in Trinity College, Dublin; was incorporated by Royal Charter of KING CHARLES II. A.D. 1667; and re-incorporated by their Majesties KING WILLIAM and QUEEN MARY, A.D. 1692, under the title of "THE KING AND QUEEN'S COLLEGE OF PHYSICIANS IN IRELAND."

The Charter of WILLIAM and MARY, and the Act of the Irish Parliament, 1 Geo. III., cap. xiv. made perpetual by the Act 30 Geo. III., cap. xiv., § 11, confer on the Fellows and Licentiates of the King and Queen's College of Physicians the title of Doctors of Physic.

EDUCATION, EXAMINATION, AND ADMISSION OF CANDIDATES FOR THE LICENTIATESHIP IN MEDICINE.

I.—Candidates for the Licentiateship in Medicine are required to make application to the College according to the form supplied by the Registrar.

II.—Candidates are required to produce the Treasurer's Certificate of having lodged the Admission Fee.

III.—Candidates are required to produce Certificates of having attended the following Courses for the periods specified:—

Anatomy and Physiology,	12 Months.	Botany,	3 Months.
Or, { Anatomy and Physiology,	6 Months.	Medical Jurisprudence,	3 Months.
and		Practice of Medicine,	6 Months.
Institutes of Medicine,	6 Months.	Practice of Surgery,	6 Months.
Practical Anatomy and Demonstra-		Midwifery, and Diseases of Women	
tions,	12 Months.	and Children, one course of	6 Months.
Chemistry,	6 Months.	or two Courses of 3 Months each.	
Operating Chemistry, in a recognised		Practical Midwifery, in a recognised	
Laboratory,	3 Months.	Hospital,	6 Months.
Materia Medica,	6 Months.		

In addition to the above Courses, Candidates are required to have attended a Medico-Chirurgical Hospital, in which regular courses of Clinical Lectures are delivered, together with Clinical Instruction, for twenty-seven months, or such Hospital, for eighteen months, with nine months' attendance on a Medical Hospital, with similar courses of Clinical Lectures and Clinical Instruction; the attendance in each case being for not more than nine months in any year, and the attendance on a Medico-Chirurgical Hospital and Medical Hospital not being taken out in the same year.

Candidates who are not personally known to any resident Fellow of the College are required to transmit Testimonials of Character from registered Members of the Medical Profession; those from Physicians or Surgeons attached to Public Hospitals or Infirmarys being preferred.

Students are recommended to divide their course of study into two periods, of two years each; the first to comprise Anatomy and Physiology, or Institutes of Medicine, Surgery, Chemistry, Botany,

and Hospital attendance; the second to comprise Practice of Medicine, Materia Medica, Medical Jurisprudence, Midwifery, and Hospital Attendance.

The several Courses of Lectures are required to have been delivered by the respective Professors of the School of Physic in Ireland, or by other Lecturers required by the College.

IV.—The Candidate is desired to present himself for Examination within three months after he has obtained permission to be examined for the Licence.

The President and Censors examine the Candidates in the presence of the Fellows and Licentiates of the College.

The Examination is divided into two parts:—First part—Anatomy, Physiology, Botany, and Chemistry. Second part—Materia Medica, Practice of Medicine, Medical Jurisprudence, and Midwifery.

Students may be examined in the subjects of the first part at the termination of the first period of study; or in all the subjects of their education, on the completion of their Medical Studies.

Before being admitted to the final Professional Examination, Candidates are required to have passed an examination in the following subjects of preliminary education:—

English: English Composition.

Greek: Homer's Iliad, first book; or Xenophon's Anabasis, first book; or Walker's Lucian, first twelve Dialogues; at the option of the Student,

Latin: Virgil's Æneid, first and second Books; or Sallust; or first two Books of Cæsar, "De Bello Gallico;" at the option of the Student.

Mathematics: Euclid, first Book; Arithmetic, to the end of Decimal Fractions.

Students in Arts of one Year's standing, of any University in the United Kingdom, requiring Examinations in the first year, will be exempted from the preliminary Examination.

The above regulations respecting Preliminary Examination will not come into force until 1st January, 1861.

V.—Candidates qualified as follows are required to undergo the second part of the professional Examination only, viz.:—1. Graduates in Medicine of a University in the United Kingdom. 2. Fellows, Members, or Licentiates of either of the Royal Colleges of Physicians of London or Edinburgh, who have been admitted upon examination. 3. Licentiates in Surgery of five years' standing previous to 1st June, 1859.

All other Licentiates in Surgery, whose education has comprised the courses required by the College, will be examined in Botany and Chemistry, in addition to the subjects of the second part of the examination.

VI. Should the President and Fellows not be satisfied with the answering of a candidate, they may admit him to re-examination after a lapse of not less than two months.

VII. Every candidate, before being admitted as a Licentiate of the College, is required to subscribe the following declarations, viz.:—

"I, A. B., hereby authorize the President and Fellows of the King and Queen's College of Physicians in Ireland to erase my name from the list of Licentiates, and I consent to surrender my licence, and to have my privileges as a Licentiate withdrawn, if I shall, after having obtained the licence of said College, either continue to be or become a Licentiate of any Company of Apothecaries; or if I shall at any time hold or have any interest in an Apothecary's shop, or engage in any trade in any part of the United Kingdom.

"I, A. B., do hereby solemnly and sincerely promise that I will observe the Statutes and By-laws of this College, and to my power endeavour that the honour of the College be preserved entire; and in all things that belong to the honour or profit thereof, I shall be ready to give my advice and assistance.

"I engage not to practise any system or method (so called), for the cure or alleviation of disease, of which the College has disapproved; nor to endeavour to obtain practice or to attract public notice by advertising, or by any other unworthy means: I also engage that I will neither permit nor sanction the use of my name by any other party for such purposes, nor in connexion with any secret or other remedy; and in case of any doubt relative to the true meaning or application of this engagement, I promise to submit to the judgment of the College.

"I promise that in all things lawful and honest I will be obedient to the President, Vice-President, and Censors of the College.

"And I solemnly and sincerely declare, that should I violate any of the conditions enumerated in this declaration, so long as I shall be either a Licentiate or Fellow of the College, I thereby render myself liable, and shall submit to any reasonable punishment, whether censure of the College, pecuniary fine (not exceeding twenty pounds), or expulsion and surrendering of the License, whichever the President and Fellows of the College, or the majority of them, shall think proper to inflict."

If the applicant be a member of an Apothecaries' Company, he must surrender his certificate as an Apothecary previous to examination, and, if admitted, must cease to act as such in any part of the United Kingdom.

VIII. The President admits to the Licentiate'ship of the College in the following form:—

"By virtue of the authority vested in me as President, I hereby admit you a Licentiate of the King and Queen's College of Physicians in Ireland."

IX. Every member of this College who may desire to obtain the licence in Midwifery will be

required to undergo a special examination, and, if approved, will receive such licence, and rank as a practitioner in Midwifery in the authorized lists of the College.

X. Fee for the licence, 1*l.* 15*s.*, which may be divided as follows, viz.:—

For examination at the termination of the first period of Study, 5*l.* 5*s.*

For final examination for the licence, 10*l.* 10*s.*

Fee for the Midwifery Diploma, 3*l.* 3*s.*

ROYAL COLLEGE OF SURGEONS IN IRELAND.

(1784—1828—1844.)

Pres.—Mr. R. Adams. *Vice-Pres.*—Mr. W. Jameson. *Council*—A. Jacob, W. H. Porter, T. E. Beatty, W. Hargrave, J. Barker, W. Colles, J. H. Power, H. Irvine, E. Hutton, R. Pentland, S. G. Wilmot, A. P. Baonon, P. Shannon, H. Labatt, J. Smyly, B. McDowel, M. H. Callis, and J. Ledwich. *Cur. of Museum*—J. Barker. *Sec. to Council*—J. S. Hughes. *Regist.*—J. Bennen. *Court of Exam.*—R. G. H. Butcher, J. Morgan, M. H. Stapleton, B. W. Richardson, E. A. Stoker, J. Hamilton, and G. H. Porter. *Exam. in Midw.*—R. Johns, J. Quinan, and H. Minchin.

The Royal College of Surgeons in Ireland grants two different diplomas—one conferring the rank of Fellow, and the other that of Licentiate. A Fellow is a member of the corporation, and entitled to vote at all elections for president, vice-president, and councillors, and also to be elected president, vice-president, or member of council. The Letters Testimonial granted to the Licentiate enable him to "exercise and enjoy all rights of practice in the art or science of surgery, or otherwise, which are commonly enjoyed by the Fellows, and to have free access to the Library and Museum of the College, and make him eligible to the rank of Fellow, subject to specified regulations." Both Fellows and Licentiates are obliged to make and subscribe a formal declaration legally binding them to "observe and be obedient to the statutes, bye-laws, and ordinances of the College, and to the utmost of their power to promote its honour, reputation, and dignity." Fellows, in addition, declare that they "do not practise the business or profession of an apothecary or druggist, or indirectly sell drugs or medicines, and that they will not, while Fellows, practise such business or profession."

A student who proposes to become a Fellow or Licentiate of the College, must first become a Registered Pupil, for which he pays a fee of five guineas; but he is permitted to postpone such entry as Registered Pupil and such payment until the period of his final examination.

Registration of Pupils.—Every person requiring to be registered as a pupil on the College Books hall, if the Council think fit, be so registered, if he shall have laid before the Council a receipt showing that he has lodged to the credit of the President, and for the use of the College, in the Bank of Ireland, a registry fee of five guineas.

Qualifications of Candidates for Letters Testimonial.—Every registered pupil shall be admitted to an examination for Letters Testimonial if he shall have laid before the Council the following documents:—A receipt showing that he has lodged a sum of twenty guineas in the Bank of Ireland to the credit of the President, and for the use of the College. A certificate from the examiners of the

College that he has passed an examination as to his acquaintance with the Greek and Latin languages. Certificates showing that he has been engaged in the study of his profession for not less than four years. Certificates of attendance on an Hospital recognised by the Council, where Clinical instruction is given, during three years.

RESOLUTION PASSED BY THE COUNCIL ON THE 23RD JANUARY, 1846—Candidates for Letters Testimonial, who shall have attended recognised Hospitals during three Winter Sessions of six months each, shall be considered to have performed sufficient Hospital attendance; if they shall be able to produce certificates of regular daily attendance during a like number of months at a County Infirmary, or Provincial Surgical Hospital, containing at least fifty beds, provided the Surgeons of such Infirmaries or Hospitals shall make returns to this College, in the months of May and November in each year, of the number of Students so attending.

Certificates of attendance on three courses of Lectures on Anatomy and Physiology; three courses of Lectures on the Theory and Practice of Surgery; and of the performance of three courses of Dissections, accompanied by demonstrations; also certificates of attendance on two courses of lectures on Chemistry, or one course of lectures on General, and one on Practical Chemistry; one course of lectures on *Materia Medica*; one course of lectures on the Practice of Medicine; one course of lectures on Midwifery; and one course of lectures on Medical Jurisprudence.

Qualifications of Candidates for the Fellowship.—Every registered Pupil or Licentiate shall be admitted to examination for the Fellowship, if he shall have laid before the Council the following documents:—A receipt, showing that he has lodged in the Bank of Ireland, for the use of the College, the sum of ten guineas, in case he is a Licentiate, or twenty-five guineas in case he be a Registered Pupil; provided in either case he intends to reside beyond ten miles from Dublin. Should the candidate intend to reside in Dublin, or within ten miles thereof, he shall lodge, if he is a Licentiate, twenty guineas; or if he is a Registered Pupil, thirty-five guineas. Fellows entering on the country list, who may subsequently settle as Practitioners in Dublin, or within ten miles thereof, shall pay ten guineas to the College. A certificate that he is twenty-five years of age. A certificate that he is a Bachelor of Arts of some University, or that he has been examined in such manner as the Council may, from time to time, direct, with a view to ascertain that he has obtained a liberal preliminary education. A certificate, signed by two or more Fellows of the College, of good general conduct during his professional education. Certificates that he has been engaged in the acquisition of professional knowledge for a period of not less than six years, during three of which he must have studied in one or more of the Schools and Hospitals recognised by the Council. He may have studied for the other three years in any School or Schools of the United Kingdom which shall be approved by the Council, or in any foreign School of repute. It is also required that the candidate shall have had opportunities of practical instruction, as House-Surgeon or Dresser, in a recognised Hospital. Certificates of attendance on the several courses of lectures required to be attended by candidates for Letters Testimonial, together with one course of lectures on Comparative Anatomy, one course of lectures on Botany, and one on Natural Philosophy. A thesis on some Medical subject or Clinical Reports, with observations of six or more Medical or Surgical cases taken by himself. Candidates of the required age, who shall have taken the degree of Bachelor of Arts in a British or Irish University, and have complied with the foregoing regulations in other respects, will be admitted to examination at the end of five years of professional study, of which three years must have been passed in one or more of the recognised Schools or Hospitals. Licentiates of the College, who may not be able to show that they have followed the course of study specified in the preceding regulations, may, at the expiration of ten years, from the date of their diploma, be admitted to the examination required for the Fellowship, provided they produce such evidence as shall be satisfactory to the Council that they have conducted themselves honourably in the practice of their profession.

Qualification of Candidates for the Diploma in Midwifery.—Any Fellow or Licentiate of the College shall be admitted to an examination for the Diploma in Midwifery upon laying before the Council the following documents:—A certificate, showing that he has attended one course of lectures on Midwifery and Diseases of Women and Children, delivered by a Professor or Lecturer in some School of Medicine or Surgery recognised by the Council. A certificate showing that he has attended the practice of a Lying-in Hospital, recognised by the Council, for a period of six months; or the practice of a Dispensary for Lying-in Women and Children, recognised by the Council, and devoted to this branch of Surgery alone. A certificate, showing that he has conducted thirty labour cases at least. Candidates for the Midwifery Diploma shall be publicly examined on the organization of the female; the growth and peculiarities of the fetus; the Practice of Midwifery, and the Diseases of Women and Children; and, if approved of, shall receive a licence or diploma certifying the same.

Examination of Candidates for Letters Testimonial.—The examinations of candidates for Letters Testimonial shall be held, from time to time, as the Council may direct. Five Examiners at least shall be present at each examination. Each candidate shall be examined upon Anatomy, Physiology, the Theory and Practice of Medicine and Surgery, *Materia Medica*, and the form of Prescription, and shall perform such Surgical Operations or Dissections, or explain such Anatomical and Pathological preparations as the Examiners may require. Candidates whose answering shall be found insufficient will not be allowed to present themselves a second time until after the expiration of six months from their first examination.

Examination of Candidates for the Fellowship.—The examinations for the Fellowship shall be held at stated periods, as the Council may direct. Five Examiners at least, together with the President, or Vice-President, and two members of the Council, shall be present at each examination. Each candidate shall be examined on two days, with such an interval as the Council may appoint. The subjects of the first examination shall be Anatomy and Physiology (human and comparative); those of the second, Pathology, Therapeutics, the Theory and Practice of Medicine and Surgery, and such other branch of Medical Science as the Council may from time to time direct. In addition to the oral examinations, candidates shall be required to give written answers to written or printed questions, to be delivered to them in such manner as the Council may direct. In the Anatomical examination the candidates shall also perform dissections and operations on the dead body. Candidates whose answering shall be found insufficient will not be allowed to present themselves a second time until after the expiration of one year from the first examination.

Examination in Midwifery.—The examination of candidates for the diploma in Midwifery shall be conducted by the Examiners in Midwifery. Such examinations shall be held, from time to time, as the Council may direct. Should a candidate be rejected, he shall not again be admitted to an examination until a period of three months shall have elapsed: and he then shall be obliged to produce satisfactory evidence of his having been engaged in the study of this branch of Surgery subsequent to such rejection.

Classical Examination, Registration, and Matriculation.—Registered pupils are admitted to answer the classical examination at any period previous to the final examination for Letters Testimonial. Students who are not registered pupils are also admitted to answer the classical examination upon payment of a matriculation fee of five shillings; but they are not enrolled as registered pupils, or entitled to the privileges reserved for such pupils, until they have paid the full registration fee of five guineas. The examination in Greek is in the Greek Testament, and confined to the Gospel of St. John; in Latin, in the first five books of the *Æneid* of Virgil. The certificate required by the Bye-laws to be laid before the Council by candidates for Letters Testimonial, is granted to registered pupils and students who answer this examination to the satisfaction of the Court of Examiners. Registered pupils are permitted to study in the Museum on two days in each week, and to read in the Library every day, from ten o'clock to one o'clock. They are also permitted to attend the Lectures on Comparative Anatomy, and to obtain certificate of such attendance without payment of any fee. No student is admitted as a candidate to the Sessional Examinations, or to the final examination for Letters Testimonial, until he has been enrolled as a registered pupil.

Sessional Examinations.—Pursuant to a resolution of the Council of April 7, 1847, Sessional Examinations are to be held each year in the month of May, to which such registered pupils as present themselves as candidates are to be admitted, in two classes, a senior and junior. The pupils of the junior class are required to produce certificates of attendance in the School of the College, or in a recognised School, during two Winter Sessions at least; and those of the senior class similar evidence of attendance during three Winter Sessions. Such pupils as pass a Sessional Examination in each of these two classes are subject to an examination on one day only at the final trial for the Letters Testimonial of the College.

REGULATION OF SCHOOLS.

School of the College.—The School of the College shall be under the control of the President and the Council, and subject to such regulations and supervision as they may, from time to time, establish.

General Regulation of Schools.—Certificates shall not be received for attendance on Lectures delivered in Ireland, unless from Teachers in Schools permitting the visitation of the Council, and receiving their sanction; nor shall certificates be received from Teachers who deliver Lectures upon more than one distinct subject as hitherto allotted to Professors in Colleges and Universities. That the following new Bye-law be, and it is hereby enacted—"Certificates of attendance on Lectures and of the performance of Dissections, shall be received from Professors and Lecturers in all Universities, Colleges, and recognised Schools in her Majesty's dominions, as qualifications for the Fellowship and Letters Testimonial of this College; and also Certificates of attendance on all Hospitals recognised by the Council, where Clinical instruction is given."

This regulation shall not, however, exclude the Certificates of two or more Teachers, who may deliver conjointly, separate, perfect, and distinct courses on Anatomy and Physiology, and on the Theory and Practice of Surgery. Certificates shall not be received for attendance on Lectures on Anatomy and Physiology, unless such Lectures shall have been delivered upon at least five days in each week of the usual winter season, between October and May; nor on the Theory and Practice of Surgery, unless delivered within the same period, or at least three days in each week. The courses of Lectures on the Practice of Medicine, Chemistry, *Materia Medica*, Midwifery, and Medical Jurisprudence, shall consist of sixty Lectures at least; and the course of Dissections and Demonstrations shall be of six months' duration.

The following Ordinance was made by the Council of the College on the 9th of April, 1851:—"To enable Surgical Students to devote more time to Hospital attendance and Dissection during the Winter Session, the Lectures on *Materia Medica*, Medical Jurisprudence, Practical Chemistry, and Botany, shall be delivered during the Summer Session in the School of the College, and in the Schools recognised by the College; and certificates granted subsequent to the 30th of April, 1851,

shall not be received as qualification for Letters Testimonial, unless issued in conformity with this regulation." Similar regulations have been adopted by the Council of the College of Surgeons, England.

Certificates shall not hereafter be received for attendance on Lectures delivered in Ireland unless from persons who shall have acquired, either by education or practice, such ample information on professional subjects generally as is required from candidates for the Fellowship of the College, and who shall have enjoyed such opportunities of acquiring information on the particular subjects upon which they propose to lecture, as the Council may consider necessary to qualify them to perform that duty.

Returns of Students attending Lectures.—Professors and Lecturers are required to transmit to the College, on or before the 25th of November in each year, returns of the names of the pupils who shall have entered to attend, and are then actually attending their respective Lectures or Demonstrations. They are also required to ascertain, from time to time, whether the students so returned are in attendance or not, as similar returns are required in the course of the session. Certificates of attendance are not received as qualification for the Letters Testimonial or Fellowship of the College unless the name of the Candidate who produces them appears in these returns for the periods corresponding to the dates of such certificates.

APOTHECARIES' HALL OF IRELAND.

(1791.)

Governor—Mr. C. Shaw. *Dep.-Governor*—C. Holmes, M.D. *Court of Exam.*—Dr. E. H. Bolland, Dr. J. Betty, Mr. T. Collins, Dr. Leet, Dr. McMunn, Dr. H. P. Nolan, Dr. R. Mulock, Mr. J. O'Flaherty, Dr. G. B. Owens, Dr. J. Shea, Dr. Madden, sen., Dr. Wyse, and Dr. Madden, jun.
C. H. LEET, Secretary.

REGULATIONS REGARDING THE EDUCATION AND EXAMINATION OF CANDIDATES FOR THE LICENCE TO PRACTISE AS AN APOTHECARY.

Every Candidate shall undergo a preliminary and a professional examination.

Candidates for the preliminary examination (for the Certificate of Apprentice) shall be examined in the following:—In Latin—the Catiline Conspiracy of Sallust, and the first three books of the *Æneid* of Virgil;—in Greek—the Gospel of St. John, and the first twenty Dialogues of Lucian, or the first two Books of Homer's *Illiad*;—In French—Telemachus or the History of Charles XII.;—in Science—the first two books of Euclid, Algebra inclusive of Simple Equations, and Arithmetic to the end of Decimals;—and, in English—writing a short Composition.

Candidates for the professional examination (for the licence to practise as an Apothecary) shall produce Certificates to the following effect:—

1. Of having passed the Preliminary Examination.
2. Of being twenty-one years of age, and of good moral character.
3. Of having served an Apprenticeship, of not less than three years, to a qualified Apothecary in practice.
4. Of having attended the following courses, viz.:—Chemistry, during one Winter Session. Anatomy and Physiology, during two Winter Sessions. Demonstration and Dissections, during one Winter Session. Botany and Natural History, during one Summer Session. Materia Medica and Therapeutics, during one Summer Session. Practical Chemistry, during three Months.* Principles and Practice of Medicine, during one Winter Session. Midwifery and Diseases of Women and Children, during Six Months. Practical Midwifery, attendance upon twenty Cases. Surgery, during one Winter Session. Medical Jurisprudence, during one Summer Session.
5. Of having attended, at a recognised Hospital or Hospitals in the United Kingdom, the Practice of Medicine and Clinical Lectures on Medicine during two Winter and two Summer Sessions; also the Practice of Surgery and Clinical Lectures on Surgery during one of the Winter and one of the Summer Sessions.

The examination for the Licence to practise as an Apothecary shall be divided into two parts. It shall be conducted as follows:—

The first examination—On Chemistry, Botany, Anatomy, Materia Medica, Therapeutics, and Pharmacy.

This examination shall be principally experimental and demonstrative; the candidate shall also translate Latin prescriptions into English.

The second or final examination—On Medicine, Surgery, Physiology, Pathology, Midwifery and Medical Jurisprudence.

* Comprehending practical exercises in conducting the more important processes of General and Pharmaceutical Chemistry, in applying tests for the presence of poisons, and in the examination of mineral waters and animal secretions.

This examination shall be partly written and partly *vivâ voce*, and shall include the demonstration of morbid preparations and drawings. The candidate shall also write prescriptions in Latin.

The first of these examinations may be undergone at the close of the second Winter Session, and the second or final not before the completion of the fourth Winter Session. The Licence entitles its possessor to register as a qualified Medical Practitioner under the Medical Act, 1858.

The Court hold an Examination of Candidates on the first Friday in each month, at three o'clock, P.M., in the order in which their names appear on the Roll. The Preliminary Examination of Apprentices will take place every Friday, at two o'clock, P.M.

Candidates for the Licence must lodge their Testimonials and enrol their names with the Secretary at the Hall, in Dublin, a full month prior to the day of Examination.

A rejected Candidate cannot be re-admitted to examination until the expiration of six months.

Candidates for the Certificate of Assistant to an Apothecary, in compounding and dispensing medicines, must have completed at least three years' Apprenticeship with an Apothecary, and must produce indentures to that effect, together with a certificate of good moral character.

The examination of the intending Assistant will be restricted to Pharmacy, scientific and practical, (inclusive of Hydrostatics as applied to Pharmacy,) and the history and character of Medicines, with their mode of preparation, combination, and doses.*

An Examination of Apprentices is held at the Hall, in the first week in May annually, upon some subject of Medical or Physiological Chemistry, which is announced by the Council at the commencement of the previous Winter Session, and a prize of Five Guineas is awarded to the successful competitor.

In reference to the foregoing curriculum and Examinations, the Council observe that every Candidate for the Preliminary Examination must have read all the books in the prescribed course, and must undergo such examination in them as shall satisfactorily test his grammatical knowledge of the languages, and his acquaintance with the working of the several mathematical and arithmetical problems and calculations; after passing which trial successfully he receives the "Certificate of Apprentice," the possession of which is necessary to his being articulated to an Apothecary, with whom he is required to serve a *bonâ fide* pupilage of not less than three years.

Every Candidate for "The Licence" must produce his Matriculation Certificate, his Indenture duly attested, a copy of his Baptismal Registry or other satisfactory evidence of his age, and Certificate of having diligently attended the Curriculum laid down by the Council.

The Examination for "The Licence" consists of two parts, each occupying at the least one hour. In the first part, the candidate is required to recognise and describe samples of drugs and plants used in medicine, and to indicate the chemical and physical means of distinguishing them; to enumerate and explain the pharmaceutic preparations of the Pharmacopœia, with their uses and doses; to translate Latin prescriptions correctly; and to answer questions upon Human Anatomy, preparations of which will be laid before him.

In the second part, the candidate, having passed the first part satisfactorily, is tested as to his knowledge of those general facts and principles which constitute the basis of Medicine;† he must answer, *vivâ voce*, and in writing, questions in the several departments of Medical Science, and demonstrate and define diseased structure and injuries from Pathological illustrations, and give also the appropriate treatment and the form of prescription suitable in each case.

The examinations shall be conducted in as practical a manner as possible, to the exclusion of all unnecessary details.

By authority of the Council,

CHARLES HENRY LEET, M.D., Sec.

* The subjects for this Examination will be taken from the following books:—1. "Manual of Hydrostatics," by Galbraith and Haughton; 2. "Pharmacy," by Parrish; 3. "Materia Medica," by Royle; and 4. "The Pharmacopœia."

† The Council recommend, in addition to the ordinary manuals, the careful study of the following works, viz.:—"The Principles of Medicine," by Williams; "The Action of Medicines," by Headland; "The Principles of Surgery," by Miller; "Clinical Lectures," by Graves, or Todd; "Animal Chemistry," by Lehmann; "Surgical Pathology," by Paget; "Hygiene," by Pickford.

SCHOOLS OF MEDICINE IN IRELAND.

THE ADELAIDE HOSPITAL,

PETER-STREET, DUBLIN.

Phys., Drs. J. F. Duncan and A. Hudson. *Surgs.*, Messrs. A. J. Walsh, M.D., J. K. Barton, M.B., J. Morgan, and B. W. Richardson.

The Winter Session of this Hospital commences the first Monday in October. It now contains 100 beds, of which 24 are devoted to the Special Diseases of Infants and Children.

Clinical Instruction.—Two Medical and Two Surgical Lectures, including Lectures on the Diseases of the Eye, will be delivered in each week, beside Instruction being given daily by the Physicians and Surgeons. Practical Demonstrations in the use of the Stethoscope and Microscope, as applied to the diagnosis of disease, will be given during the Session.

Hours of Attendance.—The Physicians will visit the Hospital daily at half-past Eight, A.M.; the Surgeons at half-past Nine, A.M., punctually. Operations which admit of delay will be performed on Wednesdays and Saturdays. As far as practicable, notice of all operations taking place at other times will be given to the Students.

Order of Business.—Monday: Lecture (Surgical) at half-past 9; Tuesday: Lecture (Medical) at half-past 8; Wednesday: Operations; Thursday: Lecture (Surgical) at half-past 9; Friday: Lecture (Medical) at half-past 8; Saturday: Operations.

Dispensary.—There is a numerously-frequented Dispensary attached to the Hospital, which is attended daily by the Physicians and Surgeons, who will instruct the Students in the diagnosis and treatment of the various forms of disease brought before them. Every facility will be given to the Students for the performance of the minor operations in Surgery.

Fees.—For Nine Months' Hospital Attendance, 8*l.* 8*s.*; for Six Months', 6*l.* 6*s.*; for Summer Three Months', 3*l.* 3*s.*; Perpetual Pupils (paid at entrance), 21*l.* Students in Arts of the University of Dublin are allowed the reduction given at other Hospitals.

Prizes.—Two Medical and Two Surgical Prizes will be given at the close of the Session.

Hospital Residence.—A House next door to, and communicating with, the Hospital has been fitted up for the reception of a limited number of Students, who will thus have the combined advantages of a private and Hospital residence.

Certificates of Attendance upon this Hospital are fully recognised by the King and Queen's College of Physicians in Ireland, the University of Dublin, the Queen's University in Ireland, the Royal Colleges of Surgeons, England and Ireland; the Army, Navy, and East India Boards, &c. The central position of the Hospital, and its close proximity to the Schools of the Royal College of Surgeons, and the Ledwich School, render it peculiarly convenient to Students attending those Institutions. Further particulars can be obtained from Mr. RICHARDSON, Secretary to the Medical Board, 2, North Frederick-street; or any of the other Physicians or Surgeons.

CARMICHAEL SCHOOL (FORMERLY RICHMOND HOSPITAL SCHOOL OF ANATOMY, MEDICINE, AND SURGERY).

NORTH BRUNSWICK-STREET, DUBLIN.—FOUNDED 1828.

Anatomy and Physiology.—Mr. H. Curran. Daily, at twelve o'clock.

Theory and Practice of Surgery, and Operative Surgery.—Mr. Hamilton and Dr. R. McDonnell. Monday, Wednesday, and Friday, at eleven o'clock.

Theory and Practice of Medicine.—Dr. Mayne. Monday, Wednesday, and Friday, at two o'clock.

Midwifery and Diseases of Women and Children.—Dr. Denham. Tuesday, Thursday, and Saturday, at three o'clock.

Materia Medica and Pharmacy.—Dr. Frazer. Monday, Wednesday, and Friday, at three o'clock.

Chemistry.—Dr. Davy. Tuesday, Thursday, and Saturday, at two o'clock.

Descriptive and Practical Anatomy.—Dr. Cruise. At one o'clock daily.

Medical Jurisprudence.—Dr. O'Reilly. Monday, Wednesday, and Friday, at two o'clock.

Botany.—Dr. Kinahan. Monday, Wednesday, and Friday, at ten o'clock.

Fee for each of the above Courses of Lectures, 2l. 2s.

Examination upon the several subjects taught forms a part of the system of education in this School.

The Museum comprises a rare and valuable collection of Anatomical and Pathological Preparations. There is also an extensive Museum of *Materia Medica*.

The Dissecting Rooms, which are spacious and thoroughly ventilated, were opened on the 1st of October. The building in which this course of Medical Education is conducted, stands in an open and healthy situation. Gas-light has been introduced into the Dissecting-rooms. Messrs. Jennings, Telford, and Maunsell will attend constantly in the rooms, to assist the Students in Practical Anatomy. This School is in the immediate vicinity of the Richmond Surgical, the Whitworth Medical, and the Hardwicke Fever Hospitals, containing in all 300 beds; Steeven's Hospital, Jervis-street Hospital, the Apothecaries' Hall, Great Britain-street Lying-in Hospital, Richmond Lunatic Asylum, &c. &c.

Certificates of Attendance on the Lectures are received by the Trinity College, Dublin, Queen's University in Ireland, the King and Queen's College of Physicians in Ireland, the different Colleges of Surgeons, the Army and Navy Medical Boards, the Universities of Glasgow, London, St. Andrew's and Aberdeen, the Faculty of Glasgow, and by the Apothecaries' Halls, London and Dublin.

CARMICHAEL PREMIUMS.—By a bequest of the late Richard Carmichael, Esq., these Premiums, to the value of 50l., have been continued. Public Examinations will therefore be held, and the Premiums awarded as usual, at the termination of the Course, to those who answer best in the various branches of Medical Science taught in this School.

SUMMER SESSION.

The Summer Session, during which regular Courses of Lectures will be delivered on Practical Chemistry, *Materia Medica*, Botany, and Medical Jurisprudence, will commence immediately after the Easter recess. Carmichael Premiums will be awarded in these Classes at the termination of the Session.

For further particulars apply to Dr. Mayne, 13, Upper Gloucester-street; Dr. McDonnell, 11, Lower Pembroke-street; Mr. H. Curran, 71, Blessington-street; or Dr. F. Cruise, 37, Westland-row.

This School being duly licensed according to the provisions of the Anatomy Act, and conducted in conformity with the Bye-laws, Rules, and Regulations of the various Medical Bodies in Great Britain and Ireland, and the Professors being recognised Lecturers of long standing, the certificates for attendance issued by them are recognised as legal documents, entitling the possessor to an examination for any of the foregoing qualifications, by the different public Medical Bodies in Great Britain and Ireland.

At the termination of the Session, Public Examinations will be held, when, in addition to the usual Prizes in each class, three Gold Medals will be awarded for the best answering in the three following combined subjects: 1. Anatomy, Physiology, and Chemistry. 2. Surgery, and Practice of Medicine. 3. Practical Chemistry, *Materia Medica*, and Medical Jurisprudence. The Examinations consists of three parts:—Written, *viva voce*, and Practical or Demonstrative.

For further particulars, application to be made to the Honorary Secretary, Dr. Hayden, 60, Harcourt-street; or to any of the other Professors.

CITY OF DUBLIN HOSPITAL, UPPER BAGGOT-STREET.

Phys. and Surgs.: Dr. A. Jacob, Dr. T. E. Beatty, Dr. C. Benson, Dr. W. Hargrave, Dr. T. G. Geoghegan, Mr. J. Tufnell, and Dr. J. H. Power. *Cons. Phys.*: ———, and Dr. Apjohn. *Cons. Surgs.*: W. H. Porter, M.D., and J. W. Cusack, M.D.

The arrangements of the City of Dublin Hospital are such as to afford to the Pupils an opportunity of studying disease in all its forms, Medical and Surgical. The morning visit commences daily at nine o'clock, when the nature, treatment, and progress of each case are explained at the bedside of the patient, and ample opportunity afforded to every Student of becoming practically acquainted with the use of the Stethoscope. Clinical Lectures are delivered after the hospital visit.

Special wards are appropriated for the reception of Ophthalmic cases, and a distinct course of Lectures upon Diseases of the Eye is delivered by Dr. Jacob, which the pupils are privileged to attend without additional fee. Extended opportunities are thus afforded for acquiring a thoroughly practical knowledge of this important subject.

A certificate of having attended for three months one of the Institutions, or the wards of an hospital, especially devoted to the treatment of Ophthalmic disease, is now required from all candidates for the appointment of Assistant-Surgeon in the Service of Her Majesty's Indian Army.

A ward is appropriated to the Diseases of Females, and Clinical Instruction is given upon all forms of Uterine Affection by Dr. Beatty.

The Purser Studentship of 20*l.* per annum (with Apartments), founded by William A. Purser, Esq., a former Pupil of this Hospital, is open to all Students, according to merit.

Every facility is given to Students desirous of acting as Dressers and Clinical Assistants, subsequent to which all Pupils of the Hospital are eligible to the situation of House-Surgeon, according to merit.

Connected with the Hospital is an extensive Dispensary, at which the Pupils are allowed to perform the minor operations, under the guidance of the Surgeons, and are rendered familiar with the details of Dispensary management.

Under the direction of the Medical Attendants, objects requiring for their elucidation the aid of the microscope or chemical analysis, will be submitted to examination and the inspection of the pupils by Dr. Egan and Mr. A. H. Jacobs, who will also instruct the pupils in case taking.

A *Lending Library* of well-chosen books has been provided for the use of the Pupils; and a registry of the cases in Hospital is kept by the House-Surgeon, to which they have free access.

Certificates of attendance on this Hospital are recognised by all the Colleges, Universities, and Halls, and by the Army and Navy Medical Boards.

The Winter Session commences in October. The Summer Session in April.

Fee for Winter Six Months, 6*l.* 6*s.*; Summer Six Months, 4*l.* 4*s.*; Nine Months, 8*l.* 8*s.*

For further particulars apply to Charles Benson, Esq., M.D., 42, Fitzwilliam-square West, or at the Hospital.

The Hospital contains forty beds; the number of patients annually admitted into the Labour Wards amount to nearly *Six Hundred*, whilst those attended at their own homes from the Hospital considerably exceed that number.

A Ward has been allocated for the treatment of *Female Diseases*, and Diseases of Children, and there is likewise connected with the institution a DISPENSARY for Diseases of Females and Children, Diseases of the Eye, and General Diseases, at which nearly Sixteen Thousand Patients are annually prescribed for, and where the pupils have every opportunity of performing the minor operations in Surgery, and of attaining a knowledge of Practical Pharmacy.

admirable Wax and Plaster Casts, and a good collection of Instruments, supplies additional means for the acquisition of essential information.

There is most comfortable accommodation in this Hospital for Eight Intern Pupils, who enjoy unusual privileges and advantages, and have peculiar facilities for acquiring a practical knowledge of the Midwifery branch of their profession.

The Governors of the Coombe Hospital, anxious to extend the benefits of that Institution as widely as possible, and to afford the student additional facilities for increasing his practical knowledge, have, in accordance with the suggestion of the Dublin Hospital Commissioners, opened "*The Peter-street Auxiliary to the Coombe Lying-in Hospital.*"

In it there is a *Ward for Lying-in Women*, and another for the treatment of *The Diseases of Women*; there is also attached to it a *Midwifery Dispensary*, from which a large number of Labour Cases will be attended at their homes.

The accommodation for *Intern Pupils*, in the Auxiliary Hospital, is most excellent, a Sitting Room having been appropriated for their exclusive use, and several Bed Rooms having been comfortably fitted up, each capable of containing either two or three Students.

The *Extern Pupils' Room* is fitted with Gas, and is rendered, in every respect, suitable for its purpose; and thus the diligent Student can occupy his time profitably while waiting his turn for duty.

The Winter and Summer Courses of Clinical Instruction commence on the First Monday in November and May respectively. Candidates for the Diplomas of the different Colleges and Halls are required, by recent regulations, to attend a Six Months' Course of Practical Midwifery; but Gentlemen can enter at any time during the year for six months from the date of entrance.

Clinical Lectures are delivered regularly twice a week by the Masters, one of whom daily visits the Wards of the Hospital, at the hour most convenient to the majority of the Pupils; whilst a Registry of Cases is kept by the Clinical Clerks, who are selected each half-year from amongst the most attentive Pupils, to whom distinct certificates are given.

At the termination of each Session, *Prizes* are given to the best answerers in Practical Midwifery; and at the expiration of Six Months from the commencement of their attendance, the Pupils are eligible to be examined for the Diploma of the Hospitals.

Pupils entering for attendance at either of the above Hospitals, have the privilege of attending the practice, and enjoy all the advantages of the other, whereby a twofold benefit is afforded them; whilst from the arrangements effected, these two Hospitals may practically be considered as but one; and thus combined, may be looked upon as *The Midwifery Institution* of the greater portion, if not of the whole of the *South Side of the City*.

THEORETICAL LECTURES.—In connexion with the Hospital, Dr. RINGLAND delivers a Course of Lectures on the Theory and Practice of Midwifery, and the Diseases of Women and Children, in the Original School of Medicine, Peter-street; and Dr. SAWYER, a like Course at the Royal College of Surgeons; these Lectures, commencing the First Monday in November and May, respectively, are illustrated by Plates, Casts, Instruments, and Pathological preparations.

A *Public Examination* on all the subjects of these Lectures is held at the termination of each Session, when Prizes are awarded to the most proficient of the Pupils who have attended the respective Courses.

Certificates of attendance on the Practice of these Hospitals, as well as on the course of Lectures, are received by the King and Queen's College of Physicians of Ireland; by the Royal Colleges of Surgeons in Dublin, London, and Edinburgh; by the Universities of London and Glasgow, and the Queen's University in Ireland; by the Marischal College and University, Aberdeen; the King's College, Aberdeen; and the Faculty of Physicians and Surgeons of Glasgow; by the Apothecaries' Halls of Dublin and London; and by the Army, Ordnance, Navy, and East India Medical Boards, &c.

Hospital Visit: Daily at eight a.m., by the Physicians and Surgeons.

Clinical Lectures are given by the physicians and surgeons, during the session, at nine a.m., four days in the week.

Surgical Operations: On Fridays, at nine a.m., except in cases of emergency, when notice will be sent to the pupils in the recognised residences.

The Out-Patients are prescribed for on Tuesdays, at half-past ten, when the pupils have an opportunity of performing the minor surgical operations.

Ophthalmic Surgery: Patients with diseases of the eye are treated on Saturdays, at nine a.m., by Mr. S. A. Cusack, who will deliver a course of lectures on ophthalmic surgery during the summer session.

Dressers: There is accommodation in the hospital for two medical and six surgical resident pupils.

Midwifery: A maternity department, for the delivery of lying-in women at their own homes, is conducted under the superintendence of the physician-accoucheur. A midwifery diploma will be granted at the end of the session to those pupils who have attended a sufficient number of cases, and passed a satisfactory examination. Two assistants to the physician-accoucheur are each year taken from this class by competition; salary 50*l.* per annum.

The Reading Room and Museum are open daily to the pupils of the hospital and school. There is also a *Lending Library*, containing every modern medical and surgical work.

Hours of Attendance.—*Hospital Visit and Clinical Lectures*: Medical Visit—Monday, Wednesday, and Friday, at eight; Clinical Lectures—Wednesday and Friday, at nine; Surgical Visit—Tuesday, Thursday, and Saturday, at eight; Clinical Lectures—Monday and Thursday, at nine; Operations—Thursday, at nine; Pathological Demonstrations by the Lecturers, as opportunity offers. Medical College: Descriptive Anatomy, Dr. E. Hamilton—daily, except Saturday, at ten; Practice of Medicine, Drs. Freke and Burke—Tuesday, Thursday, and Saturday, at eleven; Surgery, Mr. Colles and Mr. Wilmot—Monday, Wednesday, and Friday, at eleven; Anatomy and Physiology, and Morbid Anatomy, Mr. S. A. Cusack—daily, except Saturday, at twelve; Chemistry, Drs. Aldridge and Cameron—Monday, Wednesday, and Friday, at one; Materia Medica, Dr. Gordon—Tuesday, Thursday, and Saturday, at one; Midwifery and Diseases of Women and Children, Dr. Hardy—Monday, Wednesday, and Friday, at four; Dissections, by the Professors of Anatomy and Demonstrators—seven a.m. to eight p.m., commencing October 1st.

Summer Courses: Lectures will be delivered during the summer session on Botany, Materia Medica, Jurisprudence, Practical Chemistry, Comparative Anatomy, and Logic.

Fees: The fees for the hospital practice and lecturers will be the same as those of the other Dublin Hospitals and Schools.

Matriculated Pupils: Students who wish to take out all the courses of lectures and hospital certificates required by the College of Surgeons and other licensing boards, in the institution, may become matriculated pupils of the hospital and college, on payment of seventy guineas. Such pupils will have all the advantages of apprentices, and will have a priority of claim to subsequent hospital appointments. The governors of Dr. Steevens's Hospital have adopted the matriculation system in hope that parents and guardians will communicate with one of the professors, under whose care a pupil is placed, both at his first entrance, and also from time to time during the progress of his subsequent studies.

Exhibitions: Examinations will be held at the end of the session, and prizes awarded for the best answering in the several subjects taught. There will also be a prize for the best reported series of cases, to consist of not less than six medical and six surgical cases, which have occurred in the hospital during the session.

Exhibitions will be awarded to those whose answering indicates general proficiency in every branch of the Profession. One day in the week will be devoted by each professor to examination in the subject last taught.

Medical Tutor: Dr. E. Hamilton prepares gentlemen in anatomy, medicine, and surgery for the examinations of the several colleges and examining boards. The Rev. W. P. H. Dobbin, A.M., Ex-S.T.C.D., chaplain to the hospital, prepares gentlemen for the preliminary classical examinations at the College of Surgeons, Apothecaries' Hall, &c.

Recognised Residences: In addition to the apartments in the hospital, arrangements have been made to provide pupils with lodgings in the neighbourhood, on reasonable terms. Parents and guardians availing themselves of this accommodation will have the alternative of placing the pupil under the superintendence either of the chaplain of the hospital or one of the professors.

Further particulars may be learned from any of the professors, from Dr. Hamilton, at the hospital, or from Mr. S. A. Cusack, 7, Upper Merriion-street.

MEATH HOSPITAL AND COUNTY OF DUBLIN INFIRMARY.

WINTER SESSION.

The usual courses of clinical instruction will be commenced on the first Monday in November, and will be continued through the Session by the Physicians and Surgeons of the Institution. Arrangements have been made to prevent the hours of attendance and lectures from interfering with any other place of instruction in Dublin.

The Medical and Surgical Clinical Instruction will be given upon *alternate days*. The Surgical upon Mondays, Wednesdays, and Fridays, and the Medical upon Tuesdays, Thursdays, and Saturdays. Two Medical and Two Surgical Clinical Lectures will be delivered each week.

Operations, unless in cases of emergency, will only be performed on the days of Surgical Instruction. Every attention is paid to the instruction of Pupils in the minor operations of Surgery, for which a large daily attendance of extern Patients affords ample opportunity. A Registry of all surgical cases admitted into the Hospital is carefully preserved, and is open to the inspection of the Pupils.

Premiums in Clinical Medicine and Surgery will be awarded as usual by the Medical Board at the close of the Session.

The situation of Resident Pupil is open to Pupils as well as Apprentices of the Hospital. Special recommendatory certificates are given to such gentlemen as have filled the situation of Clinical Practising Assistants in the Hospital for at least four months, to the satisfaction of the Medical Officers. Certificates of attendance on this Hospital are acknowledged by all the Colleges, Universities, Halls, and Boards.

* * The Hospital is only a few minutes' walk from the College of Surgeons, and from the Ledwich School of Medicine.

The Medical Clinical Instruction is given by Drs. W. Stokes and C. Lees.

The Surgical, by Drs. W. H. Porter, J. Smyly, F. Rynd, G. H. Porter, M. H. Collis, and J. H. Wharton.

For further particulars apply to Dr. J. H. Wharton, *Sec.*, 34, York-street; or at the Hospital.

A Course of Operations to be performed by the Student, under the superintendence of the Lecturers (subjects, &c., included), 5l. 5s.

Fee for each Course of Lectures, 2l. 2s.

This School, claiming priority of foundation many years before any of its kindred unchartered institutions were projected, was established in 1810 by J. Kirby. At this period the Schools of the College of Surgeons and University were the only sources of medical education in Ireland, and this necessarily involved an absence of that competition always conducive to the true spirit of improvement. Since its foundation, this School has maintained its character for the sound principles of its anatomical and surgical instruction, and numbers amongst its former pupils several of the most distinguished teachers of the Irish School of Medicine.

Endowments in favour of Students, subject to the conditions prescribed by the Founder, in the following departments:—two in Anatomy and Physiology; two in Minute Anatomy: two in practical Anatomy, and one in Surgery. The usual prizes in the other departments will be awarded at the termination of the Session.

Certificates of attendance upon these lectures are recognised by the Queen's University, Ireland; the King and Queen's College of Physicians; by the University; the College of Physicians of London; Trinity College, Dublin; the Colleges of Surgeons in Dublin, London, and Edinburgh; the University of Glasgow, as constituting an "*Annus Medicus*;" the Faculty of Glasgow, by the Army and Navy Medical Boards; and the Apothecaries' Halls, London and Dublin.

Sec., Mr. E. Ledwich, 38, York-street, Dublin.

The County Galway Infirmary, Town, and Union Hospitals, are in the immediate vicinity of the Queen's College. They contain upwards of 200 patients, and afford every means of obtaining practical knowledge in both Medicine and Surgery. They are visited every morning by Professors of the College, who deliver Clinical Lectures there three times a week.

RICHMOND, WHITWORTH, AND HARDWICKE HOSPITALS.

NORTH BRUNSWICK-STREET, DUBLIN.

The Course of Attendance and Clinical Lectures at these Hospitals commenced in November, and will be continued during the Winter and Summer Sessions.

These Hospitals contain 312 beds, and have attached to them the Truss Establishment for the relief of the ruptured poor of Ireland; also a well-selected Medical and Surgical Library.

There is an extensive Museum, containing nearly four thousand morbid preparations, casts, and drawings, with case-books containing the reports, available for Clinical Instruction, and always accessible to the Hospital Class.

The Surgeons visit daily at half-past eight o'clock, and the Physicians at ten o'clock, a.m.

Two Surgical and two Medical Clinical Lectures are delivered in each week, in addition to the usual Clinical Instruction, which is given daily by the Physicians and Surgeons. Special Courses of Clinical Instruction are given on Fevers and Epidemic Diseases, Diseases of the Eye, and Mental Diseases, and special certificates awarded.

The Resident Pupils and Clinical Clerks of these Hospitals are selected from the Class, according to merit.

The instruction in *Clinical Medicine* is given by the Physicians, viz.: Drs. D. Corrigan, J. Banks, B. G. McDowell, and S. Gordon.

The instruction in *Clinical Surgery* is given by the Surgeons: E. Hutton, M.D., R. Adams, M.D., Mr. J. Hamilton, R. W. Smith, M.D., and C. Fleming, M.D.

Practical Pharmacy is taught under the superintendence of the Apothecary of the Hospital.

Attendance for nine months on the practice of a General Hospital, with attendance on the Clinical Lectures on Medicine and Surgery therein delivered, is, by a regulation of the Board of Trinity College, required from candidates for the degree of M.B.

The regulations of the East India Council require attendance upon a course of Clinical Lectures on Diseases of the Eye, which will be delivered during the Session, and for which distinct certificates will be given. Attendance on a Lunatic Asylum is also required. The Richmond Institution for the Insane, accommodation 600 patients, is in the immediate vicinity of the Hospitals, and is open to pupils at a moderate fee.

Adjoining these Hospitals is the Carmichael, late the Richmond Hospital School of Medicine, where regular courses of Lectures are delivered on the several subjects of Medical Science.

The London College of Surgeons, and the Queen's University, require a list of the pupils entering for the Winter Session to be transmitted to their Secretaries respectively on or before the 25th of November next.

Terms of Attendance.—For the Winter Session of six months, *sl.* 8s.; for the Summer Session of three months, *sl.* 3s.

For further particulars, apply to the Secretaries, Dr. Hutton, 5, Merrion-square South; Dr. Gordon, 11, Hume-street; or at the Hospitals.

The Hospital, which is on the principle of the hospitals in Paris, contains 100 beds, constantly occupied by instructive cases.

A large ward has been opened for the reception of children, on the plan of the "Enfants Malades;" and will afford opportunity for studying the diseases of early life.

Connected with the hospital is an extensive Dispensary, where abundant means are presented for the acquisition of medical and surgical knowledge.

The Hospital is visited daily, at nine o'clock a.m.

Medical and Surgical Clinical Lectures will be delivered three times a week during the Session, and clinical instruction daily. Operations admitting of delay will be performed on Fridays, at ten a.m. The Clinical Lectures will be illustrated by the Museum, which contains a splendid collection of original drawings, casts, and preparations.

Certificates of attendance on the practice of this hospital are recognised by the College of Surgeons, London and Dublin, London University, the Queen's University in Ireland, the Apothecaries' Halls, London and Dublin; the Army and Navy Medical Boards, &c.

At the end of the Session, a prize will be awarded to the pupil who shall give the most satisfactory evidence of proficiency in Medico-Chirurgical knowledge, acquired at the bed-side.

Dr. O'Ferrall will also, at the end of the Session, award a prize to the pupil who shall produce the series of cases containing the most accurate description of Diseases of Children.

Further particulars may be learned by inquiring at the hospital during the hours of attendance.

Her Majesty's Government have formed in Dublin a Museum of Irish Industry, to represent and exhibit the materials for agricultural, mining, and manufacturing industry which Ireland contains, and to elucidate and expose the means by which those materials may be rendered available for the improvement of this country.

The institution embraces a chemical department, destined for carrying on such investigations as may extend our knowledge of the physical history and industrial capabilities of Ireland, and supply that analytical information as to the nature of our soils upon which sound agricultural improvement must be based.

The Museum includes a department of documents and records of an economic or descriptive character regarding the past history and present condition of our mining, manufacturing, and agricultural industry. To these documents reference shall at all times be easy to those persons interested in their study.

The information collected by the officers of the Museum, and the results of the investigations carried on in the establishment, will be from time to time published.

To an institution founded for such beneficial objects, the active co-operation of all classes may reasonably be expected; and Sir Robert Kane, the director, receives donations for the Museum, specimens of which will, when prepared for exhibition, be in every instance deposited in the Museum with the donor's name affixed. It is necessary that donations should be accompanied by an accurate description of their origin; and, if the director be apprized beforehand of the nature of the donation which it is intended to present to the Museum, he will be happy to supply special instructions as to the means to be taken to render the specimens the most suitable to the Museum, and the most honourable to the donors.

This Society meets on the second Wednesday in each month from November till June, both inclusive, at eight o'clock in the evening, for the reading and discussion of papers on Geological subjects. The meetings are held in the New Buildings, Trinity College. Members are admitted on being proposed by one member, seconded by another, and approved by the Council. 1*l.* is paid on admission, and 1*l.* annually; or 10*l.* life composition. Non-resident members are admitted on paying 5*l.* Under-graduates are admitted as associate members on paying 5*s.*, and being proposed and seconded as ordinary members.

***DUBLIN—THE IRISH ARCHEOLOGICAL AND CELTIC SOCIETY.**—Instituted 1855. *Patron*, H.R.H. the Prince Consort; *Pres.*, Duke of Leinster; *Vice-Pres.*, Marquis Kildare, Earl Leitrim, Earl Dunraven, Lord Talbot de Malahide, and Very Rev. C. W. Russell, D.D.; *Counc.*, Mr. E. Curry, Rev. T. Farrelly, Rev. Dr. C. Graves, Rev. J. Graves, Rev. M. Kelly, Lieut.-Col. T. A. Lareom, Mr. P. V. Fitzpatrick, Mr. J. C. O'Callaghan, Dr. J. O'Donovan, Dr. G. Petrie, Rev. Dr. W. Reeves, Mr. W. R. Wilde; *Treas.*, Dr. A. Smith; *Secs.*, Rev. Dr. J. H. Todd and Mr. J. T. Gilbert.

The immediate object of this Society is to print, with accurate English translations and annotations, the unpublished documents illustrative of Irish history, especially those in the ancient and obsolete Irish language, many of which can be accurately translated and elucidated only by scholars who have been long engaged in investigating the Celtic remains of Ireland; and should the publication of these manuscripts be long delayed, many most important literary monuments may become unavailable to the students of history and comparative philology. The Society also endeavours to protect the existing monumental and architectural remains of Ireland, by directing public attention to their pre-ervation from the destruction with which they frequently are threatened.

The Books of the Society are published solely for the use of its Subscribers, who are divided into two classes: Members who pay three pounds admission, and one pound per annum; and Associates who pay an annual subscription of one pound, without any entrance fee. The fundamental Laws of the Society regulate the privileges of each class of subscribers, who can also obtain the publications of the two former Societies, at reduced rates. Subscriptions are received by the Treasurer, Mr. E. Clibborn, Royal Irish Academy, Dawson-street. Persons desirous of becoming Subscribers to the Society, are requested to communicate, by letter, with the Hon. Secretaries, at No. 33, Trinity College, Dublin.

DUBLIN NATURAL HISTORY SOCIETY.—Instituted 1838. *Patron*, Archbishop of Dublin; *Pres.*, Mr. W. Andrews; *Vice-Pres.*, Rev. S. Haughton, Mr. R. Callwell, Sir E. R. Borough, Bart., and Dr. C. P. The Society was founded for promoting Husbandry and other useful Arts in Ireland, and is the oldest institution of the kind in the United Kingdom. It was chartered by George II. in 1749-50, and received for several years the annual sum of 500*l.* from the Royal Privy Purse. In 1761 it was endowed by the Irish Parliament, and has been in the enjoyment of parliamentary grants for the last ninety years.

Candidates are elected by ballot, being proposed and seconded by members at one meeting, and balloted for at the next meeting.

The session commences on the first Thursday in November, and terminates on the first Thursday in June. At the meeting on the second Thursday in November, in addition to ordinary business, the Vice-Presidents, the Honorary Secretaries, and the several Officers, Professors, &c., are balloted for and elected.

On the first Thursday in December eight standing committees are elected, who carry out the objects of the Society. Other meetings are held on the first Thursday in January (when the Council for the ensuing year is elected), the first Thursday in February, March, April, May, and June.

The meetings on the second Thursday in November, the first Thursdays in March and June, are stated general meetings pursuant to charter, at which alone bye-laws can be made or altered.

Evening meetings are held on the third Monday in each month during the session. At these meetings papers are read, and discussions elicited upon subjects connected with Practical Science and Art.

The Council meets weekly (except during the recess), and at three o'clock on such Thursdays as are unoccupied by meetings of the Society, and consists of seven Vice-Presidents, two Honorary Secretaries, the Chairman, and one member from each of the Committees, and nine members from the Society at large not being on any of the Committees.

The Library contains 30,000 volumes. There is an extensive Botanic Garden, and a fine Agricultural Museum; also, a Museum of Natural History, one of Geology, and a Statue Gallery of Ancient and Modern Art open daily to the public.

The Government School of Art is consolidated with the Drawing School of the Society.

The Annual Meeting is held on the first Monday in May at Barrington's Hospital.

MEDICAL BENEVOLENT FUND SOCIETY OF IRELAND.—Established in 1842, for the relief of Medical men, under severe and urgent distress, occasioned by sickness, accident, or any other calamity: and, under circumstances of peculiar emergency, may be extended to widows and orphans.

RULES OF THE SOCIETY.

1. That a charitable fund be created by Donations and Subscriptions, to be called the Medical Benevolent Fund of Ireland.

2. That contributions be received from all persons friendly to the objects of the Society though not belonging to the profession.

3. That the object of the Fund be the relief of Medical men under severe and urgent distress, occasioned by sickness, accident, or any other calamity.

4. That any Physician or Surgeon labouring under such afflictions be considered a fit object for the charity.

5. That the claims of contributors shall, as far as possible, have the preference, but that contributions to the Fund give no claim of right to relief, the Fund being one of pure charity; and that each case be judged according to the urgency of the distress.

6. That under circumstances of peculiar emergency, relief may be extended to the widows and orphans of Physicians and Surgeons, it being understood that it is not the design of this Fund to relieve Medical men from the necessity of providing for their families by ordinary life assurances, and such other means as prudence dictates.

"But if any provide not for his own, and specially for those of his own house, he hath denied the faith, and is worse than an infidel."—1 Tim. v. 8.

7. That the management of the Fund be conducted by Committees of the contributing members, annually appointed; the Central Committee to be at Dublin, and Local Committees, subordinate to the Central, in each of the principal cities and towns; the Central Committee having power to appoint Local Committees wherever they may be required.

The following are the Committee, Treasurer, Secretaries, and Trustees for the ensuing year:—

Dr. T. E. Beatty, Dr. C. Benson, Dr. T. Brady, Dr. F. Churchill, Dr. M. Collis, Dr. D. J. Corrigan, Dr. C. P. Croker, Dr. J. W. Cusack, Dr. M. W. Daly, Dr. V. Duke, Dr. J. F. Duncan, Dr. T. town, Sligo, Tyrone, Waterford, Wexford and Wicklow. The *Hon. Secs.* of each are included in the above list. All donations and subscriptions are funded, and interest applied to the purposes of the Society. The funded property, at present, amounts to upwards of 4,496*l.* The Annual Meeting is held on the first Monday in June each year, alternately in the Hall of the King and Queen's College of Physicians, and of the Royal College of Surgeons, Dublin.

SOUTH EASTERN MEDICAL ASSOCIATION.—Established 1856. *Pres.*, Dr. Mackesy, Waterford; *Hon. Sec.*, Dr. Elliott, Waterford; *Counc.*, Drs. Edmundson, Battersby, Coghlan, Long, Carney, Waters, Martin, Cavet, and Conolly.

ULSTER MEDICAL PROTECTIVE ASSOCIATION.—Established 1859. *Chairman*, Dr. William McGee, J.P.; *Treas.*, Dr. Patterson; *Hon. Sec.*, Dr. Sam. Browne, R.N.

The objects of this Association are to protect the interests of the Profession in the admission of members; to sustain the rights and status of qualified practitioners; to watch over, and, if desirable, to promote such legislative measures as may seem generally useful; and, in these objects, to act in concert with the Irish Medical Association. The members meet at Belfast General Hospital the second Thursday in every month, at three p.m. The Annual meeting takes place in May.

This Society has been established upwards of 150 years, and is the oldest Life Assurance Institution in existence. Its principles are essentially those of Mutual Assurance, and the whole of the profits are divided among the members.

By a recent alteration of the Bye-Laws of the Society, policies are now granted on the bonus plan, entitling the assured to a bonus at the expiration of every five years, instead of seven years, from the date of each policy.

Assurances may be effected for any sum not exceeding £7000 on one and the same life, either with or without participation in profits.

In the event of a life assured dying within three calendar months after the day stipulated for the payment of the annual premium, although such premium be unpaid at the time of the decease, the policy will continue in force, provided the premium be paid (pursuant to the Society's Bye-Laws) before the expiration of three calendar months from the day on which it became due.

The rates of premium are moderate; the sums assured are guaranteed by a large accumulated capital invested in the Government funds, freehold estates, and other approved securities; and the expenses of management seldom exceed 3 per cent. on the annual income.

Loans are granted upon mortgage of freehold estates, life interests, &c.; and also upon the security of the Society's policies after three years' payments have been made.

Prospectuses and every information may be obtained at the Office.

Life Assurances are granted under an extensive variety of forms, with, or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older, and most respectable Offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force or five complete years.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The Premiums are on the lowest scale consistent with security.

The Assured are protected by an ample subscribed Capital, an Assurance Fund of upwards of £500,000 invested on Mortgage and in the Government Stocks, and an Income of £85,000 a year.

Premiums to Assure £100.			Whole Term.

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, at the end of five years, to participate in nine-tenths, or 90 per cent. of the profits.

The Profit assigned to each Policy can be added to the sum assured, applied in reduction of the annual Premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the Premiums paid was declared. This will allow a reversionary increase varying, according to age, from 66 to 28 per cent. on the Premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "whole-term" Premium may remain on credit for seven years, or one-third of the Premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

NO CHARGE FOR POLICY STAMPS.

Medical Attendants paid for their reports.

Persons may in time of peace proceed to, or reside in, any part of Europe or British North America, without extra charge.

No extra charge for the Militia, Volunteer Rifle, or Artillery Corps on Home Service.

The Medical Officers attend every day at a quarter before two o'clock.

LIFE DEPARTMENT.

The following statement will show the magnitude to which this branch of the Office business has extended.

The Accumulated Life Premiums are over	£1,717,000
And the Annual Income of the Department exceeds	190,000
The aggregate amount assured by Life Policies is more than	4,020,000
Claimants under Life Policies have received from the Office a total sum of	3,506,171
The ascertained surplus at the several divisions of profits amount to an aggregate sum of	1,948,827

The whole of which was appropriated to the Policy-holders.

Persons assuring on the Participating Scale of Premiums, in Great Britain or Ireland *respectively*, will be entitled, at the end of every fifth year, to participate in the Surplus Premiums, to be then ascertained by actual valuation.

Bonuses have been declared on Policies to an amount **greater than the sums originally assured.**

Premiums have been extinguished, where the parties assured have applied the bonus in reduction of the Annual Premiums.

The following TABLE shows the **total Additions** made to Life Policies for £1000, effected in London or through an Agent in Great Britain, which had been in force for the Forty-three Years ending at **Christmas, 1859.**

Persons assuring in Great Britain have the option of

Participating Rates of Premium, or of Non-Participating Rates.

The Premiums may be made payable annually or half-yearly, so long as the party lives; or they may cease at any given period.

Combined provision may be made for Old Age and early Death, so that a person may secure a sum of money for *himself*, to be paid at a stipulated Age, if he should live so long, or to be paid to his Executors if he should die before that age. This feature in the Atlas Office arrangements deserves particular attention, as likely to meet the requirements of a large number of persons.

Policies are also issued **on the Lives of two or more Persons**, payable on the death of *he first*, or on the death of the *last*; or to provide against the risk of one person dying before another.

On Assurances for the whole term of Life, **one-fourth part of the Annual Premium may be suffered to remain as a debt on the Policy.**

The Directors desire it to be understood that they are ready to receive proposals or Assurances on any ontinency involving payment of a sum at death.

No extra Premium is required for the voyage to, or residence in any part of Europe, during peace. Nor in the lives of persons in the army or navy while residing in the United Kingdom, in the time of peace.

ATLAS FIRE & LIFE ASSURANCE COMPANY—(Continued).

Advances are made on Life Policies to the extent of their value. Or the Directors will purchase the Interest of the Assured at an equitable price.

Lapsed Policies may be revived within three months.
Policy Stamps are not charged for.

FIRE DEPARTMENT.

This Company undertakes the Assurance of almost every species of Property in the United Kingdom, at Rates of Premium and upon principles which will be found quite as advantageous to the interests of the Assured as those offered by any other Office. The Directors can confidently refer to the well known character of the Company for liberality and promptitude in the discharge of claims made upon it during the many years it has been established.

Renewals should be paid within fifteen days after the respective Quarter-days when they become due.

Tables of Rates, forms of proposal, and any information needful to effect Life or Fire Assurances, may be obtained on application to the Office, No. 92, Cheapside, London, or to any of the Company's Agents.

50	1000	45 12 6	6	72	42 9

(Policies of One to Five Complete Years Participate in proportion.)

The above Profits are equivalent—If added to the Policy—to a Reversionary Sum at death equal to **One Pound Four Shillings per Cent. per Annum** on the Sum Insured for each of the completed years of the Policy :— Or, If taken as an **Immediate Cash Payment**, it is, at most ages, considerably more than **One Year's Premium**.

The Bonus Periods are **FIVE Years**, and the Rates of Life Premiums, whether *With* or *Without* Profits, very economical.

All classes of **FIRE, LIFE, and ANNUITY** business transacted.—Rates of Premium very Economical.—No charge for **Volunteer, Rifle, and Militia Service** within the United Kingdom.

Loans may be obtained in connexion with policies effected with the Company. There has been advanced in this respect upwards of a quarter of a million since July, 1843.

Policies are effected without loss of time, every day, from 10 to 4; Saturdays, 10 to 2; Medical Officer, daily at 11. The Board assembles on Thursdays, at half-past 12.

A great portion of the Society's Policies are upon first-class lives, but the Company being specifically established to include the Insurance of individuals of regular and temperate habits, in whom health may be more or less impaired, the Board openly seek to transact business of this class at equitable rates, founded upon a careful consideration of these cases. Lives of this description, declined at some offices, are accordingly open to acceptance at the Gresham.

REDUCTION OF PREMIUM.—Parties effecting assurances within Six Months of their last Birthday are allowed a proportionate diminution in the Premium.

FOREIGN RESIDENCE.—Persons whose lives are assured are allowed, without licence or extra charge, in time of peace, to proceed to and reside in any part of the World distant more than thirty-three degrees from the Equator; and to reside within the prohibited degrees upon payment of an extra premium.

SECURITY TO THIRD PARTIES.—Policies do not become void by the lives assured going beyond the prescribed limits,—so far as regards the interest of Third Parties, provided they pay the additional Premium so soon as the fact comes to their knowledge.

BONUS.—NINE-TENTHS of the Profits are divided at the end of every five years among the assured. The additions made to Policies have averaged very nearly *Two per Cent. per Annum*, on the sums assured. Policies becoming Claims between the periods of Division are entitled to a Bonus, in addition to that previously declared.

PUBLICATION OF ACCOUNTS.—The Annual Reports and Accounts are printed periodically. Copies may be had, with Forms of Proposal and every requisite information, upon written or personal application to the Office.

CHURCH OF ENGLAND LIFE & FIRE ASSURANCE INSTITUTION.

Head Office—5, LOTHBURY, LONDON.

ESTABLISHED 1840,

And empowered by Special Act of Parliament, 4 & 5 Vic., cap. 92.

SUBSCRIBED CAPITAL—ONE MILLION.

(A LIST OF THE PROPRIETORS PERIODICALLY ENROLLED IN THE
HIGH COURT OF CHANCERY.)

LIFE DEPARTMENT.

This Institution adopts both the **Proprietary** and **Mutual** systems of Life Assurance, and the Policy-holders in BOTH BRANCHES are fully protected by the *large Subscribed Capital* of the Company.

In the **Proprietary Branch**, Assurances are granted at the Lowest Rates of Premium consistent with the security of the Establishment. Such assurances may be effected in a great variety of ways, to suit the circumstances and convenience of the Assured. Among others, where the Policy is made payable "On the Assured attaining **Sixty** years of age, or at **Death**, if that event should happen previously," is particularly deserving of attention.

In the **Mutual Branch** of this Institution, the Policy-holders are entitled to the **Entire Profits** of the Branch, which are divided at the expiration of every fifth year. These Profits may be applied either in Reduction of the Yearly Premiums until the ensuing period of division, or in Additions to the Sums Assured.

Prospective Allowances are at each division set apart for those Policy-holders who are not immediately entitled to participate in the profits, but who will have paid five yearly premiums before the next ensuing division; thus affording to the Assured all the advantages of an **Annual Division** of Profits.

ASSURANCES may be effected on Lives, Survivorships, &c. &c., as stated in the Society's Prospectus, to any amount not exceeding £5000.

The whole available Bonus is the sole property of Life Assurers, no part whatever is taken from it to be shared amongst proprietors. The greatest advantage to Life Assurers necessarily results from this principle of Mutual Assurance, that at the end of every fifth year return is made to every Assurer of that which is then found to be an excess of payment made by him, beyond that which the circumstances of the case required, as proved by experience.

The Fee to the Medical Referees is paid by the Society.

Applications for Prospectuses, or further information, to be made at the Office, 3, BROAD SANCTUARY, WESTMINSTER.

This Society is strictly confined to the Clergy of the Church of England and of the Episcopal Church of Scotland, their wives and families, and the near relations of themselves and wives, and is distinguished from other institutions by the title of

"THE CLERGY MUTUAL ASSURANCE SOCIETY."

SECURITY COMBINED WITH OTHER ADVANTAGES.

The **Sum Assured** now exceeds £2,540,000.

The **Annual Income** is upwards of £120,000.

The **Funds Invested** amount to £870,000.

The **Bonuses** added to Policies amount to £456,135.

The **Sums Paid** to the Representatives of deceased Members exceed £1,200,000; and the Company has not in a single instance been engaged in litigation with respect to the payment of the claims.

The **Profits** are divided *quinquennially*—**Five-Sixths** being allotted to the Assured, and the remaining One-sixth added to the Capital, and permanently reserved as a Security to the Assured.

Annual Bonuses are allotted to Policies that become claims any time after three years' Premiums have been paid.

The **Rates of Premium** will be found very advantageous, especially to Young Assurers.

The **Policy Stamp** and **Medical Fees** are paid by the Company.

The **Usual Commission** allowed to Solicitors and others introducing Assurances at the Head Office.

Sir John Young, Bart.

ACTUARY AND SECRETARY.—Charles Jellicoe, Esq.

The realized Assets of this Company amount to about Two Millions Sterling.

The Annual Income is about Three Hundred and Eighty-five Thousand Pounds.

The number of existing Policies is upwards of Sixteen Thousand Five Hundred.

The total Amount assured exceeds Nine Millions.

The Divisions of Surplus are quinquennial, and the whole Surplus (less twenty per cent. only) is distributed amongst the Assured. At the Division of Surplus in 1857 about £208,000 was added to the Sums assured under participating Policies. The Premiums required, although moderate, entitle the Assured to 80 per cent. of the Quinquennial Surplus.

The Lives assured are permitted, in time of peace, without extra charge, to reside in any country (Australia and California excepted) north of 33 degrees north latitude, or south of 33 degrees south latitude, or to pass by sea (not being seafaring persons by profession) between any places lying in the same hemisphere distant more than 33 degrees from the Equator.

All Policy Stamps and Medical Fees required on effecting Assurances are paid by the Company.

By recent enactments, persons are exempt, under certain restrictions, from Income Tax, as respects so much of their income as they may devote to Assurances on Lives.

The Annual Reports of the Company's state and progress, Prospectuses, and Forms, may be had, or will be sent, post free, on application at the Office, or to any of the Company's Agents.

Income.—Arising from the Interest on the above Capital, and the Annual Premiums on existing Policies, £420,000 per annum.

Division of Profits or Bonus.—Two-thirds of the clear Surplus Stock is decennially appropriated as a Reversionary Bonus; but parties may receive the value in present money of such reversionary benefits, or may apply them in reduction of their future Annual Premiums. In the event of a participating policy becoming a claim between the decennial periods of division, it receives a further addition in respect of every annual premium become due and paid thereon since the preceding appropriation; so that the profits are to a certain extent distributed annually.

The remaining third of the Surplus is reserved for security, and as an accumulating fund for future distribution.

The sum paid by way of Bonus, or for Additions to claims on death, and for Additions redeemed in the ten years ending 31st December, 1859, exceeds **Three Millions and a Half.**

ADVANCES ON POLICIES.—The Directors, under a recent Bye-law, are prepared to grant Loans on unencumbered policies effected in this Office, not exceeding **NINE-TENTHS** of the value of such policies.

THE EQUITABLE SOCIETY now offers to Insurers the Security of a very large Capital, and, in the present position of the Society, confers a right to participate, after payment of the Sixth Annual Premium, in the Profits of the Office, such Profits being increased by the accumulations from a large Surplus reserved out of former Divisions of Profit.

When the Income, the early Division of Profits, the regularly published Annual Expenses of this Office, and the very large proportion which the Capital bears to the whole amount of the sums assured, together with the additions upon them, are taken into consideration, the public may clearly perceive the great advantages it holds out to new Assurers.

(By Order of the Court of Directors.)

ARTHUR MORGAN, *Actuary.*

 A Weekly Court is held every Wednesday, from Eleven to One o'Clock, at the Society's House, near Blackfriars Bridge, to receive Proposals for new Assurances; and attendance is given at the Office every day from Ten to Four o'Clock; where, upon Application, the Results of the Proposals may be known.

PLAN OF THE GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.

This Society is established on the tried and approved principle of Mutual Assurance. The Funds are accumulated for the exclusive benefit of the Members under their own immediate superintendence and control. The profits are divided annually, and applied in reduction of the current Premiums.

Every Policy-holder assured according to the participation scale is a Member, and as such is entitled to his due share of the profits, after payment of five yearly Premiums.

Every Member assured for £500 is entitled, after payment of one Annual Premium, to attend and vote at all Annual and other General Meetings. Members assured for larger amounts are entitled to one vote for every £500 assured.

Every Member requiring it is allowed credit for half the amount of the first five Annual Premiums.

No claim can be litigated or disputed except with the concurrence of the Members present at a General Meeting, specially convened on the occasion.

The Directors and Auditors consist of Members assured to the extent of £1000. The Auditors and three of the Directors vacate their offices annually, but are eligible for re-election by the Members.

Extensive Tables of Non-participation Rates have been constructed for the accommodation of different classes of Policy-holders.

LIFE DEPARTMENT.

The important advantages offered by the plan and constitution of the Life Department of this Society are—

That Insurers are protected by a large Invested Capital, upon which there is no Interest to pay, and for which no deduction of any kind is made; which enables the Directors to give the whole of the Profits to Insuring Members.

That the Profits are divided annually amongst all Members of five years' standing, and applied towards reducing Life Insurance to the lowest possible rates of Premium.

The abatement of Premium on all Policies of five years' standing was in 1842, 1843, and 1844, at the rate of £45 per cent. in each year; in 1845, 1846, 1847, and 1848, £50 per cent. in each year; and in 1849, 1850, 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858, 1859, and 1860, £52 10s. per cent. in each year; and it is expected that an equal abatement will in future be annually made.

Persons insuring their own lives, or the lives of others, may become Members.

Persons who are willing to forego participation in the Profits can insure at a lower rate than that charged to Members.

The following Table will show the effect of the Reduction of Premium made by the Society on Members' Policies that have been five years in force:—

Age when Insured.	Sum Insured.	Annual Premium for first Five Years.	Reduced Annual Premium.
	£	£ s. d.	£ s. d.
30	100	2 13 5	1 5 6
40	100	3 7 11	1 12 3
30	500	13 7 1	6 7 0
40	500	16 19 7	8 1 3
45	1000	38 19 2	18 10 1
40	2000	67 18 4	32 5 2
45	5000	194 15 10	92 10 6

This system of reducing the Premiums affords immediate benefit to the Members, and enables them to insure a further sum upon their Lives equal to more than one-third of the present policy, without any additional outlay.

NO CHARGE FOR POLICY STAMPS.

FIRE DEPARTMENT.—Insurances are effected on every description of property at the usual rates.

Solicitors—Messrs. Simpson, Roberts, and Simpson, 62, Moorgate-street.

THE LIFE ASSOCIATION OF SCOTLAND is one of the most successful Assurance Institutions in the kingdom, and its regulations are framed on the most liberal footing. During the year ending 5th April, 1860, 1177 new policies have been issued, assuring £531,820. The Accumulated Fund is now upwards of £495,801, and the Annual Income, £163,177.

ANNUAL ALLOCATION OF PROFIT.

An allocation of Profit is made *every year* to participating Policy-holders of five years' standing at the date of the preceding balance, and the share of profit is applied in reducing their next premiums. Each Policy-holder thus enjoys *during his own life* his share of the profit. The annual return of profit to Policy-holders of the first series, now closed, has now attained to 37½ per cent. of the premiums—that is, a Policy-holder whose premium is £50 obtains this year a return of £18 15s., and another, whose premium is £25, obtains £9 7s. 6d.

EXAMPLES.—POLICIES OF £1000.

UNCONDITIONAL ASSURANCE ON LIFE.

The Association has lately adopted a NEW SCHEME OF UNCONDITIONAL ASSURANCE ON LIFE, which entirely obviates the ordinary system of other Offices. The following are some of the arrangements:—

No RESTRICTION is imposed as to OCCUPATION or RESIDENCE.

No EXTRA PREMIUMS can be payable.

OMISSION to pay a Premium by oversight does not affect the Assurance.

This Corporation has granted Assurances on Lives for a period exceeding 130 years, having issued its first policy on the 7th June, 1721.

Two-thirds, or 66 per cent. of the entire profits, are given to the Assured.

Policies may be opened under any of the following plans, viz.—

At a low rate of premium, without participation in profits, or at a somewhat higher rate, entitling the Assured, either after the first five years, to an annual abatement of premium for the remainder of life, or, after payment of the first premium, to a participation in the ensuing quinquennial Bonus.

The high character which this ancient Corporation has maintained during nearly a century and a half, secures to the public a full and faithful declaration of profits.

The Corporation bears the whole expenses of management, thus giving to the Assured, conjoined with the protection afforded by its Corporate Fund, advantages equal to those of any system of Mutual Assurance.

All Policies are issued free from Stamp Duty, or from charge of any description whatever, beyond the Premium.

The fees of Medical Referees are paid by the Corporation.

Annuities are granted by the Corporation, payable half-yearly.

The following important Benefits are afforded by this Company:—

1st.—A guaranteed Return will be made at any time for the surrender of existing whole term Policies, effected by even rates, of 40 per cent. of the amount of ordinary Premiums received thereon. This is an advantage which it is believed has not hitherto been afforded by any other Assurance Company.

2nd.—A person desirous of surrendering his Policy may receive, instead of a payment in cash, a new Policy for an equivalent sum, not subject to further payment of Premium.

3rd.—Credit given for one-third of the Premiums upon whole term Policies.

4th.—Notices of assignments received and registered, and acknowledged if required.

5th.—No claim will be disputed, except in case of palpable fraud: an unintentional error will not vitiate a Policy.

6th.—No entrance money or fee of any kind, nor any charge made for Policies.

7th.—Loans are granted on deposit of Policies of five years' standing to the extent of their value.

8th.—No appearance before the Court of Directors required.

The Income for 1859 was £77,000.

The Accumulated Funds on 31st Dec., 1859, were £390,000.

Prospectuses, Forms of Proposal, and every information, may be obtained at either of the Offices as above, or from any of the Agents throughout the kingdom.

BANKERS.

THE UNION BANK OF LONDON.

All the benefits of Life Assurance are offered by this Company to their fullest extent, combined with the first great requisite of an Assurance Office—viz. : Absolute Security that the sum stipulated in the Policy will be forthcoming when due.

THE RATES OF PREMIUM are moderate and equitably graduated according to age.

Several new systems of Life Assurance have lately been published by this Company. Amongst these the Half-premium system enables persons to assure for little more than half the usual cost, *without incurring any debt on their Policies*. (See Prospectus.)

THE PROFITS are distributed every seven years. Bonus additions may be commuted for a cash payment, or applied in reduction of future premiums. *Nine-tenths or Ninety per Cent.* of seven years' profits will be divided in 1865.

The Company has just returned nearly £137,000 of Profits for the last seven years, as shown in the Prospectus. Each assurance of £1,000 opened on the profit system, for that period had from £87 10s. to £122 added to it, according to the age of the Assurance.

The new Life Business of 1859 amounted to £449,913, greatly exceeding that of the previous year. The new Premiums for the year were £14,170 1s. 6d., and the total funds of the Company amounted to £1,031,454.

Fire Insurances are transacted by the Company at the same rates as those of other established offices.

New Prospectuses, Forms of Proposal, and all necessary information, may be obtained on application at the Company's Office—

FIRE DEPARTMENT.

The Company grants Insurances against Fire on every description of Property, at Home, in the Colonies, and elsewhere.

FOREIGN INSURANCES.—The Directors, having had all the important places abroad practically surveyed, are enabled to offer unusual advantages as regards rates of Premium and Conditions, and a Discount is allowed to Merchants and others effecting their own and correspondents' Insurances.

LIFE DEPARTMENT.

The ordinary rates cover residence in all parts of the world distant more than 33° from the Equator.

The *whole of the profits* of this Branch are divisible, in terms of the Act of Incorporation, amongst the insured, the expenses of management being limited to ten per cent.

As an illustration of the proportion which the additions already made to Policies bear to the sums paid by the assured in the shape of Premiums, it will be sufficient to state that a Policy for £1000 taken out in 1836, on a life then aged 25, and upon which £503 have been received by the Office, has been increased by successive bonus additions to the sum of £1351 1s. 10d., the increase being equal to SEVENTY PER CENT. on the Premiums paid by the assured.

Prospectuses and Tables of Rates may be had on application at any of the Head Offices or Agencies.

This Society is one of the very few Mutual Insurance Companies, and having no proprietary to absorb the profits of the Institution, offers to its members the full benefit of the system.

Its invested Capital exceeds £2,100,000, and it possesses large reserves applicable to future Bonuses.

Its rates are considerably below those usually charged—under 45 not less so than 10 per cent. Thus, at the medium age of 40, the sum of £33 19s. 2d., which, at the ordinary premium of £3 7s. 11d. per cent. will insure £1000, with the Norwich Union will insure £1095 8s. This is itself equivalent to a considerable immediate Bonus.

Insurances may be effected for sums payable either at death or on attaining a given age.

One-half of the first five Annual Premiums may remain as a permanent charge upon Policies granted for the whole duration of life.

Annuities are granted and special risks undertaken on favourable terms.

Policy Stamps are paid by the Office.

This Society is wholly distinct from the Norwich Union Fire Office, which is a proprietary body.

The Norwich Union Fire Office was established in 1797. By the constitution of the Society, three-fifths of the surplus Premiums are periodically distributed by way of Bonus to the Assured, who have thus received, from time to time, returns amounting in the aggregate to nearly £400,000. The advantages of the mutual principle without the liabilities are thus extended to the Fire Insurers in this Company, who are free from all responsibility on account of its engagements.

The Premiums charged by this Office are upon the most moderate scale, and in no case higher than those required by other Offices making no return to their Insurers.

No Charge is made for Policy Stamps or Medical Fees.

Policies are purchased by the Office, or loans may be obtained upon them when their surrender value amounts to £20 and upwards.

If a party neglect to pay for the renewal of his Policy, he may repair the omission any time within twelve months, upon proof of good health.

The Profits (subject to a trifling deduction) are divided among the Insured. The plan upon which they are divided gives to each party insured a share proportionate to the amount of the Premiums he has contributed.

In addition to these advantages, the Directors adopt the principle of allotting a Bonus to Policies entitled to participate in Profits lapsing between the Quinquennial Periods of Division, at the rate of £20 per cent. on the aggregate amount of Premiums paid on each such Policy from the then last Quinquennial Division.

The Directors have always acted upon the principle that they are bound to receive the Renewal Premium upon a Policy any time within the thirty days' grace allowed, notwithstanding the death of the Life Insured.

The following Extract from the LIST of CLAIMS paid by the "PROVIDENT," is published with the sanction of the parties interested in the Policies, some of whom have accompanied their acknowledgment of the unexpected advantages with an earnest desire that the widest circulation may be given to the publication.

THE MUTUAL LIFE ASSURANCE SOCIETY.

ESTABLISHED A.D. 1834.

39, KING-STREET, CHEAPSIDE, E.C., LONDON.

This is a purely MUTUAL LIFE ASSURANCE SOCIETY. On the 1st January, 1860, the Capital was £352,798, invested in Government and Real Securities, created entirely by the steady accumulation of the Premiums, and all belonging to the Members. The Assurances in force were £1,461,567, and the Income upwards of £61,000 per annum.

No extra charge to assurers joining Volunteer Rifle or Artillery Corps.

Assurances are granted upon the lives of persons *in every profession and station of life.*

Officers serving in the Royal Navy are assured on particularly favourable terms, and Premiums have been constructed on sound principles with reference to every British Colony.

Policies on the lives of Officers and others residing abroad can be effected conditionally, subject to proof, satisfactory to the Directors, to be afterwards produced, that they were at the time eligible for Assurance.

By payment of a proportionate addition to the Premium, in case of increase of risk, persons assured in this office may change from one climate to another, without forfeiting their Policies, and on returning to this country will be required to pay the Home Premium only.

Medical Referees are remunerated in all cases submitted to them for their professional opinion.

From the commencement of this Society, the first condition of Assurance, endorsed on every Policy issued, has been "that payment within the thirty days' grace allowed will be sufficient to keep the Policy in force, notwithstanding the person whose life is assured may have died within such thirty days."

* * Board-day, Friday, at One o'clock, and facilities afforded for effecting Assurances on other days of business. Prospectuses and every information may be obtained by application, either personally or by letter to the Secretary, at the Office, 13, Waterloo-place, London, S.W., or from any of the Agents of the Society.

FIRE, LIFE, and MARINE ASSURANCES may be effected with this Corporation on advantageous terms.

Life Assurances are granted with, or without, participation in Profits ; in the latter case at reduced rates of Premium.

Any sum not exceeding £15,000 may be assured on the same Life.

The Reversionary Bonus on British Policies has averaged 48 *per cent.* upon the Premiums paid, or very nearly 2 *per cent. per annum* upon the sum assured.

The future divisions of Profit will take place every Five Years.

The Expenses of Management, being divided between the different Branches, are spread over a *larger amount of Business than that transacted by any other Office.* The charge upon each Policy is thereby so much reduced as to account for the magnitude of the Bonus which has been declared, and to afford a probability that a similar rate will be maintained at future Divisions.

This Corporation affords to the Assured a liberal participation in Profits, with exemption under Royal Charter from the liabilities of Partnership ;—a rate of Bonus equal to the average returns of Mutual Societies, with the guarantee not afforded by them, of a large invested Capital-Stock ;—the advantages of modern practice, with the security of an Office whose resources have been tested by the experience of nearly a Century and a half.

The Corporation have always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps, within the United Kingdom, free of charge.

** * The Medical Attendants of Persons proposed for Assurance are always consulted by the Corporation, and remunerated for their Reports. This Office was the first among the leading Companies to adopt the Practice.*

CAPITAL, £2,000,000.

FIRE BRANCH.

Insurances against Fire are received upon all descriptions of property in the United Kingdom, the Colonies, and most parts of the globe. The rates of premium are exceedingly moderate, and governed in each case by a careful consideration of the risk proposed.

Notwithstanding the large accessions of business made annually through a long series of years, which obviously increases the difficulty of further advances, yet the Fire Premiums of the year 1859 rise above those of the preceding year by a larger sum than has been obtained by the increase of any single year since the formation of the Company, excepting the year 1853, disclosing an advance of 50 per cent. in three years.

The following figures exhibit the progress of the whole Fire Branch, running over the last ten years :—

	Total Premium received.			Increase of the Year above each preceding one.		
1850	£44,027	10	0	£9,557	19	8
1851	52,673	5	11	8,645	15	11
1852	76,925	4	2	24,251	18	3
1853	112,564	4	4	35,639	0	2

1857	175,049	4	8	23,315	15	2
1858	196,143	2	6	21,098	17	10
1859	228,314	7	3	32,166	4	9

Placing the Company among the very largest Offices in the kingdom. Indeed it is believed that there are only three Offices in existence which equal it in Fire Revenue.

LIFE BUSINESS.

The Directors desire to call the especial attention of the Proprietors to the statements of the Life Branch of the establishment.

The Actuary's Report on this subject is accompanied by an appendix, containing the fullest particulars of the investigation made, and is illustrated by two coloured diagrams, which make plain to the unprofessional eye the mortality experienced by the Royal, as indicated by curved lines, which contrast most favourably with the former averages of mortality, also displayed on the diagrams.

The figures of the year ending 1858, showing an increase of triple new business *within Four Years only* are still surpassed by the results of the NEW business of last year.

	No. of New Policies.		New Premiums.	
Year ending 1858	832		12,354.	
„ 1859	1015		13,086.	

This steady advance may be mainly ascribed to the large Bonuses assigned by the Company to the assured. The Bonus this year apportioned to the assured, with participation, amounts to £2 per cent. per annum, to be added to the original sum assured of EVERY PARTICIPATING POLICY effected previously to the 1st of January, 1858, for each entire year that it had been in existence since the last appropriation of Bonus thereon, and is one of the largest Bonuses ever declared.

THE BOARD MEET EVERY WEDNESDAY AT TWO O'CLOCK.

The St. George Assurance Company combines in one office every species of business to which the principles of Assurance are applicable, thereby affording to all classes of the community unusual facilities for availing themselves of its benefits.

THE LEADING FEATURES OF THIS OFFICE ARE:—

1. Every description of Life Assurance on the most favourable terms.
2. The Assurance of Defective Titles, thereby restoring the Property to its full value.
3. Endowments and Annuities granted on favourable terms.
4. Medical referees paid by the Company.
5. Age of the Life Assured admitted on all Policies, on reasonable proof being given.
6. Claims payable within three months after proof of death.
7. Policies in force during the days of grace.
8. No extra Premium charged to Members in the Volunteer Service.
9. Loans on Real or Personal Security, repayable by monthly or quarterly instalments, from one to five years.

MUTUAL LIFE ASSURANCE. SCOTTISH EQUITABLE LIFE ASSURANCE SOCIETY.

INSTITUTED 1831.

HEAD OFFICE: 26, ST. ANDREW-SQUARE, EDINBURGH.

LONDON OFFICE: 26, POULTRY.

The Profits are divided every *three years*, and wholly belong to the members of the Society. The last division took place at 1st March, 1859, and from the results of it is taken the following

EXAMPLE OF ADDITIONS.

A POLICY FOR £1000 DATED 1st MARCH, 1832,

is now increased to £1654 9s. 5d. Supposing the age of the Assured at the date of entry to have been 40, these Additions may be surrendered to the Society for a present payment of £363 17s. 8d., or such surrender would not only redeem the entire premium on the Policy, but also entitle the party to a present Payment of £104 4s., and, in both cases, the Policy would receive future triennial additions.

The existing Assurances amount to £5,336,014.

The Annual Revenue £190,282.

The Accumulated Fund (arising solely from the Contributions of Members) £1,261,000.

HEAD OFFICE—14, ST. ANDREW-SQUARE, EDINBURGH.

The whole Profits of the Business belong to the Assured themselves, and are divisible among those Policies on which the paid-up Premiums, accumulated at four per cent. interest, amount to the sum assured—no share being given to those whose original assurance (by reason of earlier death) occasions a loss to the Common Fund.

The Premiums are about as low as the *Non-Participating* Scales of the Proprietary Companies. The larger Assurance which they afford, as compared with other Mutual or Participating Offices, is equivalent to a very large immediate Bonus.

EXAMPLES OF ANNUAL PREMIUM TO ASSURE £100 AT DEATH.

Age—25	30	35	40	45	50
£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7

A person of age Thirty, for example, may secure £1000 at death for a yearly payment of £20 15s., which, if paid to any of the other Mutual Offices, would secure a Policy for £800 only.

The Members thus receive the largest possible Assurance for their money from the first.

Besides this immediate advantage, there is the further benefit of large prospective additions from the profits. Policies originally for £1000, which have shared at the two Septennial divisions, have been increased to £1300, £1500, or £1700, and, in some instances, to £1780.

Reports of the last Annual Meeting, with every information, may be had at the Head-Office, or at the London Branch, 66, Gracechurch-street, City.

BONUS.—The last Septennial Bonus added to the sum Insured by Policies effected in Great Britain varied from £45 to £60 per cent. on the Premiums paid on lives at the ages of 25 to 40 for the previous seven years.

By the Regulations of this Society, four-fifths, or 80 per cent., of the Office Profits are now appropriated to the benefit of the Assured, thus affording them nearly all the advantages of a Mutual Assurance Office; while the GUARANTEE CAPITAL, created under an Act of Parliament of 55th George III., with accumulations, including the remaining one-fifth of the Office Profits, and the collective Life Premiums, together amounting to upwards of ONE MILLION STERLING, invested in Government and other Securities, form an ample protection to the Assured, and guard them against the liability incurred by Members of Mutual Societies.

Loans granted on Policies to the extent of their value, when such value is not under £50.

Persons whose Lives are Assured, and not being of Military nor Seafaring occupation, are allowed in time of peace to pass by sea from one part of Europe direct to any other part thereof, in steam or other decked vessels.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on all policies effected prior to the 31st December, 1861, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of co-partnership, as is the case in Mutual Societies.

To show more clearly what these bonuses amount to, the three following cases are put forth as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£5,000	£1,987 10s.	£6,987 10s.
1,000	397 10s.	1,397 10s.
100	39 15s.	139 15s.

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

Loans granted on approved Personal Security in connexion with Assurances.

No charge for Volunteer Military Corps while serving in the United Kingdom.

Policy stamps paid by the Office.

Immediate application should be made to the Resident Director, 8, Waterloo-place, Pall Mall.

By order,

By this Institution upwards of 24,000 Policies have been issued,

And during the last Four Years upwards of Ten Thousand New Members have been added.

Business of the Year ending 31st December, 1859.

POLICIES ISSUED.	AMOUNT ASSURED.	NEW PREMIUMS.
3368.	£503,580.	£17,230 3s. 5d.

A valuation of the Assets and Liabilities of the Institution is made every five years. At the last valuation in 1855, **a Bonus was declared, ranging from 35 to 75 per cent. on the total amount of Premiums paid.**

Mr. PETER HARDY, F.R.S., reported as follows:—"I can give the Directors and Members the assurance that the amount of profit about to be divided has been fairly realised in the past transactions of the Society, and in no way includes future or anticipated profits. I therefore venture to predict, that if the Society, during the next succeeding five years, makes the same extraordinary progress which it has done during the last five, and is conducted with the same steady prudence and sagacity, that the Bonus which will be declared on the occasion of the next division will, if possible, give even greater satisfaction than the present one should do."

Statement of Business in the Five Years preceding the last Valuation, compared with that of the following Four Years.

From January, 1851, to December, 1855—Five Years.

POLICIES ISSUED.	AMOUNT ASSURED.	ANNUAL PREMIUMS.

Actuary—Christian Child, Esq.

After the operations of a quarter of a century, the Directors invite, with great confidence, the attention of the public to the marked success which has attended this Society, and to the strong claims it possesses to the confidence and support of all classes desirous of effecting Assurances on Lives. Combining the advantages of a Mutual and a Proprietary Company, and without attempting a rash competition with other offices, it has pursued a steady, progressive course, affording all the benefits which, consistently with security to Assurers and Assured, can possibly be given.

Upwards of £1,038,860 10s. 4d. have been already paid in Claims and Bonuses, and the existing Policies amount to £2,206,762 6s. 0d.

The Tables of Rates for Residents in Europe have been prepared upon the most approved principles to ensure moderation and security.

Assurances can be effected with or without Participation in Profits, on ascending or descending scales, and for a limited number of payments.

The Society advance Money on Mortgage, purchase Reversions and Life Interests, and grant Loans on such Securities and on deposit of their Policies.

An Annual Division of One-fifth of the Profits is made, 75 per cent. of which is appropriated to the Policy-holders, and 25 per cent. to the Shareholders; the remaining four-fifths are set apart towards the average of succeeding years. The Assured can apply their profits to the immediate Reduction of their Premiums, or as a Bonus to the sum assured.

All Medical Fees and Stamps are paid by the Society.

INDIAN BRANCH.

The Universal was the first Assurance Society that secured to Residents in India fixed rates, and the advantages enjoyed by those in Great Britain.

Separate Tables for the Civil and Military Services were originally framed with the utmost care from the Records of the India House, and valuable statistical returns accessible to this Society alone. To test their adaptation to the present time, and to ascertain whether any reduction could safely be made, they have recently undergone a minute and laborious investigation by two eminent London Actuaries, whose report has established their soundness and accuracy.

The Directors were enabled at the last Annual Division of Profits to announce a Reduction of Premiums on all Policies dated prior to 9th May, 1855, of £40 per cent.

The attention of persons proceeding to India, and of Residents there, is requested to a peculiar and most important advantage offered by this Society—viz., that on the return of the Assured to Europe the Premiums are reduced to the English scale corresponding with the age when the Assurance was effected, WITHOUT REFERENCE TO THE STATE OF HEALTH ON RETURN.

Tables of Rates and all further information will be furnished at the Office in London and by the Agents in India :—

* * On the 19th June, 1860, the SEVENTH QUINQUENNIAL division of PROFIT was declared. The addition made for the preceding 5 years was $7\frac{1}{2}$ per cent. on the amount of the Policy, making, with former additions, $63\frac{3}{4}$ per cent. on all Policies effected before June 1, 1826; and on each Quinquennial division a considerable Bonus was allotted to the Shares, being for the 5 years preceding 1860, £1 7s. 6d. per Share.

The Reversionary Bonus, declared in 1860, amounting to £107,149, with former Reversionary Bonuses, made a total exceeding £659,000 of additions to Policies granted out of the Profits of the Society, which Profits, on the five former Quinquennial Divisions, amounted together to £340,000, and on the present occasion to £82,000.

	£
Amount of Capital originally subscribed, £600,000, on which has been paid up	30,000
Amount Accumulated from Premiums	765,000
Annual Income	77,000
Amount of Policies in existence	1,490,000

By which it is seen that this Society possesses ample means in proportion to its liabilities.

Commission allowed to Solicitors and other Agents introducing Assurances.

The Fee to the Medical Referee is in each case paid by the Society. No charge for Policy Stamps.

Persons assured in this Office for the whole period of life may go by sea, during peace, without obtaining a Licence or paying any extra Premium, from any part of Europe to any other part of Europe.

Rather more than *five-sixths* of the Assured in this Office are Clergymen.

WATERLOO LIFE ASSURANCE COMPANY.

INCORPORATED 1851.—CAPITAL, £400,000.

Fully subscribed for by hundreds of persons of the highest character and respectability.

The Directors refer with pleasure to the following extract from a Report furnished them by Peter Hardy, Esq., F.R.S., Actuary.

“The present condition of the Society may be regarded as satisfactory. The Proprietors’ share of the surplus affords them a fair amount of remuneration for the use of their Capital, taken in conjunction with other advantages they have already enjoyed; and the sum to be divided amongst the Assured gives to them a fair amount of Bonus.”

This Office offers the benefits of mutual assurance without its liability, and will be found highly eligible for every description of Life Assurance.

No extra charge for residence in Australia.

Rates of Premium moderate.

Assurances granted against paralysis, blindness, and accidents from whatever cause arising, by way of Annuities or otherwise.

Annuities granted.

BONUSES.—The rates of this Society, when compared with the higher rates of other Offices, will be found to give an IMMEDIATE BONUS to Assurers. Large Bonuses in addition are also periodically allotted, and the next Division will be made in 1864. Besides the ordinary modes of appropriation, the Society has adopted the very important system of applying the Bonus to extinguish the Payment of the latter Premiums entirely, and to make the Policy payable during the Lifetime of the Assured.

This Association offers to Assurers the security of an ample guaranteed Capital, in addition to a large Fund invested in the Public Stocks and on Mortgage, being the accumulation of the Premiums already received on Assurances.

Eighty per Cent. of the Profits of the Association are divided every five years among the holders of Policies in the participating Class of Assurances.

The Additions made to the Sums Assured by Policies which have Participated in the four divisions of Profit up to 1857, have averaged more than 40 per Cent. of the Premiums paid on them.

The Profits may either be received in Cash, or a Bonus added to the Policy, or a reduction made in all future Annual Premiums.

When an Assurance is effected for the whole of Life, and the Age does not exceed Sixty, One-half of the Annual Premiums for the first Five Years may remain on Credit, at 5 per Cent. Interest, to be paid off at the expiration of the Five Years, or remain as a Charge upon the Policy, as may be agreed upon.

Immediate, Deferred, and Survivorship Annuities granted upon favourable terms.

The Stamp Duty on Life Assurance Policies is paid by the Office.

Every information on the subject of Life Assurance can be obtained on application at the office, or to any of its Agents.

LONDON: JOHN CHURCHILL, 11, NEW BURLINGTON-STREET.

Octavo, price Five Shillings.

ON THE HYGIENIC MANAGEMENT OF INFANTS AND CHILDREN.

BY

T. HERBERT BARKER, M.D. LOND., F.R.C.S.,

President of the South Midland Branch of the British Medical Association; Fellow and Fothergillian Gold Medallist of the Medical Society of London, &c. &c.

"Dr. Barker's treatise is addressed to the general reader, and contains profitable and available information on the subject of the physical and moral treatment of children, which it would be well for all young mothers and ladies otherwise interested in education to study. Nor do we think it inappropriate to advise the junior practitioner who is just emancipated from the discipline of the schools to read such books, for they present him with physiological aspects which are not commonly offered to him in the systematic lectures and works to which his attention has been called."—*The British and Foreign Medico-Chirurgical Review*.

"The science is, as would be expected from the author, sound; the language pleasant, if not eloquent the intention excellent. Dr. Barker would extend the domain of the physician to an extent not generally recognised as yet. It is not, he thinks—and in this we entirely agree with him—the mere duty of the learned doctor to stand by the sick bed and write the prescription. He must look to the earlier developments of human maladies, and waylay diseases while the threatened are in safety. We heartily recommend the perusal of this book to all our readers. It is a book they can read for themselves with advantage, and lend to their patients with security."—*Medical Times and Gazette*.

"All that Dr. Barker tells us is very satisfactory and to the point, and it would be well for the rising generation of the British Islands if its nurses and mothers would follow the rules the author has here laid down for their help."—*Lancet*.

"Dr. Barker gives sound instruction in simple language, which the general as well as the professional reader will readily understand. * * * We earnestly commend the work to the careful perusal of all classes."—*British Medical Journal*.

"The large mortality and extensive sickness among the young cannot be denied, and as much of this is owing to mismanagement and might be prevented, we are always glad to welcome books like Dr. Herbert Barker's, which take a sound common-sense view of the matter, and are intelligible to the public; and we shall endeavour to lay his views before the profession very much in his own words."—*Dublin Quarterly Journal of Medical Science*.

"As a popular work it avoids the dangers arising from the ambition of authors to make their volumes hand-books of domestic medicine, by which incalculable injury is done to the unfortunate objects of misplacéd medication."—*Medical Circular*.

"The importance of diet and regimen in infancy cannot be overrated, and we are greatly pleased that a treatise like the present should have been undertaken by so able a hand. This little book is not one of those additions to quackery called 'Hints to Mothers,' etc., but really contains useful instruction, evidently the result of experience and careful observation. Upon each of the subjects embraced, Dr. Barker has thrown out observations well calculated for the instruction of the youthful mother and the prejudiced old nurse. We are convinced from our own experience that one half the children born into the world are cut off prematurely, by alternate stuffing, starving, and drugging, and general bad management combined. We conclude our notice by extracting a few passages."—*The Institute of Medical, Surgical, and Obstetrical Science*.

"It is succinctly, tersely, and well written, both as to matter and as to style. It will prove a safe and most valuable guide to mothers."—*JAS. COPLAND, M.D., F.R.S.*, in a letter to the author.

"To all intelligent women, married or single, rich or poor, who would do something towards mitigating the frightful destruction of infant life that is daily going on amongst us, we can confidently recommend Dr. Barker's volume. He has not written for his professional brethren, but for the public, and in a style that everyone can understand. We recommend his volume not only to the housewife who sees after her own children, but to the lady-mothers to present to their nursemaids, as unfortunately in the present state of society the latter have much more of the management of children at the most delicate and susceptible portion of their lives than even mothers themselves."—*Athenæum*.

"Important to mothers, and to all who have the care of infant lives, is this volume."—*Critic*.

"A volume that can claim the most entire confidence of mothers, and which will secure the intense gratitude of those who may carry its principles into practice."—*British Mothers' Journal*.

"There is a maxim that Heaven helps those that help themselves. The endeavour of Dr. Barker is more charitable still; for his effort is to help those who cannot, or do not, help themselves. We trust that his work will be extensively read, and, if so, we cannot doubt that it will benefit both parents and children, by obviating much preventible disease among the latter, and removing much anxiety and unhappiness from the former."—*Bedfordshire Independent*.

"Dr. Barker's work combines scientific research with language intelligible to the non-professional reader, and his researches are in this instance directed to a subject generally rather neglected by men of talent, as if unworthy of their attention. Prevention is better than cure; if so, surely nothing can be more important than to guard and watch the growing youthful constitution, preventing tendencies to disease or malformation, rather than to wait until their development renders cure necessary. * * * We would see it in the hands of all mothers."—*The Englishwoman's Review*.

"The author occupies a high rank in the medical profession, and is entitled to the deference which may well be paid to science combined with experience."—*Nottingham Review*.

"By a timely and judicious attention to the 'Practical Observations' here presented, health and long life

Works by T. Herbert Barker—(continued).

will often be insured—by neglecting or disregarding them, a state of perpetual sickness may be entailed upon the objects of a parent's fondest affections."—*Cheltenham Chronicle*.

"This is a plain and admirably written treatise, and the rules given are clear, forcible, and convincing."—*Plymouth Journal*.

"A most useful book for mothers who would bestow the blessings of early health on their offspring."—*Shrewsbury Journal*.

"Dr. Barker, of Bedford, has reprinted an account of his clever experiments on the influence of sewage gases on the health of animals. His striking experiments fix attention upon the dangerous effects of these effluvia. They are such as issue from half the gully-holes in the metropolis; and if Dr. Barker's rats and mice and dogs grew sick, restless, and diarrhœal, it is no other than happens to the two millions of human beings who in London live 'in close chambers over sewers and cesspools.'"—*Lancet*.

TO THE MEDICAL PROFESSION.

MESSRS. HUGHES AND BUTLER

Have always on Sale a large Collection of Standard and Elementary Works, to which they respectfully invite the attention of the Medical Profession.

Gentlemen pursuing their professional studies at the hospitals of this metropolis will be able to procure all the elementary works which they may require, at the shortest notice, and on the most liberal terms.

Physicians, Surgeons, and General Practitioners will find here a large collection of standard works, by the most eminent men, on Anatomy, Physiology, Pathology, Therapeutics, and Surgery.

Chemists and Druggists also will find here a very excellent selection of the various scientific and other works they may require, including Pharmacy, Chemistry, Mineralogy, Botany, Natural History, &c.

Messrs. Hughes and Butler also take this opportunity of informing their Medical Friends, that they always have on hand a large stock of Works on every department of general literature.

Messrs. Hughes and Butler continue to keep on hand a most extensive collection of Ancient and Modern WELSH LITERATURE, to which they invite the attention of their Welsh Friends.

Fourth Edition, greatly Enlarged and improved,

A GRAMMATICAL INTRODUCTION TO THE LONDON PHARMACOPEIA and a KEY to PHYSICIANS' PRESCRIPTIONS. By F. S. LEACH.

"This little work will be found extremely useful to students who have received but an imperfect classical education."—*The Lancet*.

HUGHES and BUTLER, Medical Booksellers and Publishers, 15, St. Martin's-le-Grand.

ON DISEASES OF THE HEART: THEIR DIAGNOSIS, PREVENTION, AND TREATMENT. WITH OBSERVATIONS ON RHEUMATISM: ITS PATHOLOGY AND TREATMENT. By J. J. FURNIVALL, M.D., late Physician to two Hospitals, &c. J. Churchill, 11, New Burlington-street.

CRITICAL NOTICES.

"We recommend the perusal of this work, and repeat that the author will be found to have displayed in it a just appreciation of the Pathology and General Treatment of Cardiac Diseases." "It appears to us that very few writers have appreciated, so justly as he has done, the real character and tendencies of Cardiac Affections, and the rational plan upon which they should be treated." "The remarks upon the treatment of Dilatation accompanying the Diseases of the Valves are worthy of careful perusal; and did our space permit, we should be glad to quote from the author's views on Hypertrophy, which are very just." "The author's views are well given, and appear to be delivered by one who has tested them by his own experience, and proved their value. We would apply the same encomium to his principles of treating Dilatation."—*London Medical Gazette*.

KENT'S PHARMACEUTICAL PREPARATIONS OF BRITISH MEDICINAL HERBS.

These Preparations have received universal approbation, and gained first Prizes at the London Great Exhibition in 1851, the Paris Exhibition of 1855, and also the New York Exhibition. They may be obtained of Mr. W. KENT, Walsham-le-Willows, Suffolk; or of his Wholesale Agents, Mr. W. H. BUCKLER, Chemist, 86, New Bond-street; or Mr. C. F. BUCKLE, 3, North-place, Gray's Inn Lane, London.

TARRATT'S BANDAGE AND STRENGTHENING PLASTER.

This Plaster, from the nature of the composition, and the material on which it is spread, is adapted for a permanent bandage, as it neither produces irritation of the skin, nor, when applied, does heat cause it to lose its adaptation to the part. Having these qualities, it is peculiarly valuable in the treatment of ulcerated legs, varicose veins, &c., where equal and constant support is required. Several of the most eminent Surgeons continue to use this Plaster in their practice, preferring it in certain cases to any other. It is well suited for exportation and use in warm climates, the high temperature having less effect on it than on any other plaster.

The Profession are referred to Messrs. WESTWOODS and HOPKINS, Wholesale Druggists, Newgate-street, where the Plaster may be had in packets, containing three yards, for 2s. 6d.; or spread upon skins of chamois leather, at 3s. 6d.

WESTWOODS and HOPKINS also call attention to their Compound Adhesive Plaster for fractures and wounds, as likewise to their Concentrated Preparations, Essences, &c.

KING'S COLLEGE, LONDON.

MEDICAL DEPARTMENT.—The Students received into this Department are:—I. Matriculated Students, or those who (with certain exceptions named in the Calendar) receive their entire medical education at King's College. Matriculated Students alone have the privilege of filling the offices of Clinical Clerks, Dressers, Dentist's Assistant, Physicians' Assistant, Physician Accoucheur's Assistant, Assistant House Physician, House Surgeon, and Assistant House Surgeon, to the Hospital; of becoming candidates for the Warneford and Medical Scholarships; and of wearing the College cap and gown. They are also admitted to the practice of the Hospital at a somewhat reduced fee. II. Occasional Students, or those who enter to one or more particular Classes. Every Class is open to such students, on payment of the prescribed amount of fees. The year is divided into two Sessions. The Winter Session, beginning October 1st, terminates at the end of March. The Summer Session, beginning May 1, terminates at the end of July. The Lectures upon the various branches of Medical Knowledge are as follows:—

WINTER SESSION.—*Anatomy, Descriptive and Surgical:* Professor, Rich. Partridge, F.R.S.; Demonstrator, J. Wood, F.R.C.S.—*Physiology: General and Morbid Anatomy:* Professor, Lionel Smith Beale, M.B., F.R.S. *Chemistry:* Professor, W. A. Miller, M.D., F.R.S.; Demonstrator, E. A. Hadow, Esq. *Medicine, Principles and Practice of:* Professor, George Budd, M.D., F.R.S. *Surgery, Principles and Practice of:* Professor, William Fergusson, F.R.S.

SUMMER SESSION.—*Botany:* Professor, Robert Bentley, F.L.S. *Materia Medica and Therapeutics:* Professor, George Johnson, M.D. *Midwifery, and the Diseases of Women and Children:* Professor, Arthur Farre, M.D., F.R.S. *Forensic Medicine:* Professor, W. A. Guy, M.B., F.S.S. *Practical Chemistry:* Professor, C. L. Bloxam. *Comparative Anatomy:* Professor, T. Rymer Jones, F.R.S. *Dental Surgery:* Professor, Samuel Cartwright, jun., F.R.C.S.

Dean for the Year 1860-61: Professor Johnson, M.D.; *Sub-Dean and Medical Tutor:* John Harley, Esq. It is one of the duties of the Medical Tutor to assist the Students living in the College, as well as the non-resident Students, in the subjects of the Lectures of their first Winter and Summer Session.

N.B. By a recent regulation of the College of Surgeons, all candidates for the Diploma of the College, who shall commence their *Professional Education* on or after the 1st of January, 1861, will be required to pass a preliminary examination in the ordinary branches of a liberal education, or to produce certificates from certain specified institutions of having passed a corresponding examination. For particulars see the Regulations of the Royal College of Surgeons, quoted in the Calendar.

Students who intend to graduate in the University of London are reminded that they will be required to pass the Matriculation Examination of that University at least two years before they can present themselves as candidates for any of its degrees. A certificate of having passed this examination, is admitted by the College of Surgeons and the Apothecaries Hall as a substitute for their own preliminary examinations.

Analytical and Experimental Chemistry.—Besides the Course of Chemical Lectures, and the Summer Class of Practical Chemistry, provision is made for those Students who wish to become more minutely acquainted with the practical details of the science. The Class formed for this purpose is conducted in the Laboratory, under the superintendence of the Professors and Demonstrator. By this means each Student will be enabled to familiarize himself with the methods of analysis and research. After passing through a preliminary course of analytical operations, each Student devotes himself to such portions of the science as are most interesting to himself, or most likely to be practically useful to him.

Dental Surgery.—A Course of Lectures on Dental Physiology, Dental Surgery, and Pathology, and on Dental Mechanics, will be given during the Summer Session for those who specially enter for this Course. Special Certificates of attendance on the Dental Practice of the Hospital will be given on payment of an extra Fee of Five Guineas.

FEES.—The College fees, in the case of *Matriculated Students*, for the lectures required by the College of Surgeons and the Society of Apothecaries, amount to 61*l.* 19*s.*; those for Hospital practice to 31*l.* 10*s.*; those for Matriculation, (including Library Fee, Calendar, and College Cap and Gown,) to 4*l.* 15*s.* 6*d.*; making together 96*l.* 4*s.* 6*d.* This sum will cover all that of necessity *must* be paid for the entire three years' Course of Study. Students are, however, recommended to add to this sum 2*l.* 2*s.* for a second Course of Chemistry, as well as the Fee for attendance on the Medical Tutor's Class for one year; viz., 2*l.* 2*s.* for resident Students; 3*l.* 3*s.* for non-resident Students. All resident Students are required to attend the Tutor during their first year. The fees may be paid either in one sum on Matriculation, or in two equal sums; the one at the commencement of the first Winter or Summer Session, the other, after the first Christmas vacation, not later than Jan. 21st, unless other arrangements are made at the time of entrance. If the plan here suggested is carried out, the following will be the mode of payment.

SCHOLARSHIPS.—**A. WARNEFORD SCHOLARSHIPS.**—The sum of £200 is set apart annually, in consideration of £5000 presented to the College by the late Rev. S. W. Warneford, LL.D., for Scholarships to Matriculated Students of this Department, viz.:—Class I.—“For the encouragement of the previous education of Medical Students.” Two Scholarships of £25 per annum, for three years. Class II.—“For the encouragement of resident Medical Students.” One Scholarship of £25 per annum for two years.

B. COLLEGE SCHOLARSHIPS.—The following are given every year to Matriculated Students of this Department:—1. One of £40 for two years, open to Students of the third and fourth year. 2. One of £30 for one year, open to Students of the second year. 3. Three of £20 for one year, open to Students of the first year.

C. DANIELL SCHOLARSHIP.—This Scholarship was founded in honour of the late Professor Daniell, and is open to every Student of the College, whether matriculated or occasional, who has worked in the Laboratory for at least six months. It is of the annual value of £20, tenable for two years.

D. DIVINITY SCHOLARSHIP.—This Scholarship of £30 is also open to Matriculated Students of this Department.

PRIZES.—**A. LEATHES' PRIZES.**—The Interest of £300 bequeathed by the late P. H. Leathes, Esq., is applied in the purchase of a Bible and Prayer-book, as Annual Prizes to two Matriculated Medical Students.

B. WARNEFORD PRIZES.—The sum of £40 is set apart annually in consideration of £1000 presented to the College by the late Rev. S. W. Warneford, LL.D., and is expended in the purchase of Medals and Books, as Prizes to two Matriculated Medical Students.

C. CLASS PRIZES are awarded annually for proficiency in the several subjects of Anatomy, Physiology, Chemistry, Materia Medica, Surgery, Medicine, Midwifery, Botany, Forensic Medicine, Comparative Anatomy and Practical Chemistry. These consist of Books of the value of £3. Certificates of Honour are given to such Students in each class as the respective Professors shall consider entitled to receive them. Two Medical Clinical Prizes, one of £3 for the Winter Session, and the other of £2 for the Summer Session; and two Surgical Clinical Prizes of the same value, are given also for the encouragement of Diligence in attendance at the Hospital. All Students, *Occasional* as well as *Matriculated*, will be admitted to contend for the Class Prizes C, under rules laid down as to the number of Courses of Lectures. For particulars of all these Prizes see Calendar.

ASSOCIATES OF KING'S COLLEGE.—At the end of each Winter Session, the Professors lay before

KING'S COLLEGE—(continued).

the Council the names of those Medical Students whom they recommend to be elected Associates of King's College, London. See the College Calendar. Application to be made to the Sub-Dean of the Medical Department, in writing, previous to the 31st of March in each year.

DEGREES.—Students of this College are admitted to Degrees in Arts and Medicine, and for the Honours, Exhibitions, and Scholarships conferred by the Senate of the University of London.

By a regulation of the University of Edinburgh, three out of the four years of study required by that University for its degree of M.D. may be passed at King's College.

RESIDENCE OF STUDENTS.—Rooms are provided within the walls of the College for the residence of a limited number of Matriculated Students.

Some of the Professors, &c. receive Pupils into their houses. The Council have also sanctioned a limited number of Medical Gentlemen, residing in London or its immediate neighbourhood, to receive Pupils into their houses.

The Parents or Guardians of Students are earnestly requested to communicate with the Dean of the Medical Department before fixing their place of residence.

DINING HALL.—There is a Dining Hall in the College, for the accommodation of the resident Students, and for such other Students as may desire to avail themselves of it.

The Sub-Dean of the Medical Department attends daily at King's College, London, from 10 A.M. to 12, for the purpose of seeing Students and their friends. Any letter addressed to him on the subject of this Department, will receive early attention.

ST. MARY'S HOSPITAL MEDICAL SCHOOL.

It is a characteristic of St. Mary's Hospital that its Medical Appointments are conferred upon the Pupils *without any additional fee*. Three Resident Medical Officers are appointed for twelve months; and one, the Obstetric Officer, for six months; all of whom live free of every expense in the Hospital. The money value of these FIVE APPOINTMENTS far exceeds that of as many Scholarships of Fifty Pounds each. There are also Four non-Resident Medical Officers who are appointed for six months, and assist the Physicians and Surgeons in charge of the Out-patients.

All the above Offices are awarded after Competitive Examination, preference being given to the qualified Perpetual Pupils. Students are required to perform the duties of Clinical Clerk and Dresser during certain periods of their curriculum.

SCHOLARSHIP PRIZES AND CERTIFICATES OF HONOUR.

A SCHOLARSHIP IN ANATOMY, of the annual value of £25, is awarded to the best qualified Student; and A PRIZE is offered for the best Anatomical Preparation. PRIZES AND CERTIFICATES OF HONOUR are awarded at the end of each Session to Pupils of the first, second, and third year, for proficiency in their respective subjects of study. PRIZES in individual classes are also given.

The HOSPITAL contains 150 beds. A Ward is appropriated to the Diseases of Women, and beds are provided for Ophthalmic and Aural cases: there is a separate Out-patient department for each of these affections.

The In-Patients are visited daily at a quarter past One o'clock, and the Out-Patients are seen daily at half-past Twelve. During the past year relief was afforded to 1549 In-Patients and 13,727 Out-Patients. A Maternity Department is attached to the Hospital.

Clinical Lectures are regularly delivered twice a week by the Physicians and Surgeons.

Ophthalmic Surgery.—In addition to the Ophthalmic Practice of the Hospital, Students are permitted to attend the practice of the Royal Westminster Ophthalmic Hospital, without additional Fee.

Practical Midwifery.—When properly qualified to attend lying-in-patients, Pupils will be amply supplied with cases from the Westminster Maternity Charity.

Dental Surgery.—In addition to a special course of Lectures on Dental Surgery, practical instruction in Dental Operations will be given three times a week.

Practical Pharmacy.—Instruction in this subject, with opportunities for Dispensing, may be obtained in the Dispensary of the Hospital.

Museum, Reading-room, and Library.—The Museum of Physiological and Pathological Anatomy, the Museum of Materia Medica and a Reading-room are open for the use of the Students. The Library is open upon payment of an annual subscription of Five Shillings.

PRIZE-APPOINTMENTS AND PRIZES.

House-Physician and House-Surgeon.—The offices of Apothecary and Clinical Assistant having been recently abolished, the resident Medical Staff now consists of a House-Physician and a House-Surgeon, who, in the absence of the Physicians and Surgeons, have the sole charge of the medical and surgical patients respectively. These appointments are open to competition amongst gentlemen who have been educated at the Hospital, and who are qualified to practise under the Medical Registration Act, the successful competitors being appointed by the House-Committee upon the recommendation of the Physicians and Surgeons. Candidates are required to produce testimonials as to moral character, and certificates of having acted for a given time as Clinical Clerk or Dresser—as Clinical Clerk for the office of House-Physician, as Dresser for that of House-Surgeon. *The House-Physician and House-Surgeon are not only appointed without the payment of any fee, but they are provided with board and lodging in the Hospital, free of expense. They hold office for one year.*

Clinical Clerks and Dressers.—These appointments are conferred without fee, in rotation, upon the most diligent Students. The Clinical Clerk and Dresser of the week are entitled to have luncheon in the Hospital, free of expense.

Prizes for General Proficiency.—In order to encourage a general attention on the part of the Student to all branches of medical education successively, no prizes are given in the separate classes, but the classes are grouped in accordance with the plan laid down by the College of Surgeons and the Society of Apothecaries for the first, second, and third years of study, and a prize is given to the Student who distinguishes himself most highly in each of these groups; namely,—

- I. A Medal and Certificate for First-year Students, the subjects for examination being Anatomy, Physiology, Chemistry, Botany, and Materia Medica.
- II. A Medal and Certificate for Second-year Students, the subjects for examination being Anatomy, Physiology, Medicine, Surgery, Forensic Medicine, and Midwifery.
- III. A Medal and Certificate for Third-year Students, the subjects for examination being Surgery, Clinical Medicine, and Clinical Surgery.

The Examinations for these Prizes will be rendered as practical as possible, and in those on Clinical Medicine and Clinical Surgery the Student will be taken into the wards and his knowledge tested at the bedside.

The Prizes will not be awarded if the result of the respective examinations fall short of a standard satisfactory to the Examiners.

Prize for Clinical Midwifery.—A Case of Obstetrical Instruments.

Prize in Dental Surgery.—A Case of Dental Instruments.

WESTMINSTER HOSPITAL SCHOOL OF MEDICINE—(Continued).

BARNWOOD HOUSE INSTITUTION FOR THE INSANE,

TWO MILES FROM THE GLOUCESTER STATION.

Established under the Provisions of 8 & 9 Vict. c. 100, and 16 & 17 Vict. c. 96.

The Committee of this Institution desire it to be publicly known that it has been open for the reception of patients since last May.

It is a Registered Hospital, under the Commissioners in Lunacy, provided by the Subscribers, not with a view to private profit, but solely to afford to Insane Patients all the advantages of which their cases admit.

The building, hitherto a private Mansion, has been converted and enlarged, so as still to retain the appearance and character of a Domestic Establishment.

The Pleasure Grounds, originally spacious, have been much extended, and adapted especially to the recreation of the Inmates, and a large glazed Winter Garden for exercise and amusement in cold and wet weather is in course of erection.

The whole area of the House and Grounds occupies about Forty-eight Acres, and the present building will accommodate about Seventy Patients.

Every care has been taken in construction to insure complete ventilation and all other sanitary requisites.

The whole has been visited and thoroughly inspected by two of her Majesty's Commissioners in Lunacy, who have made a very favourable report of the Establishment, which is founded on the system recommended in the evidence given before the Committee of the House of Commons in 1858-59.

The rate of payment for Patients of the First Class will be £2 12s. 6d. weekly, and upwards, according to the accommodation they may require. Private Sitting Rooms, Special Attendants, the Use of a Carriage, &c., being made the subjects of a separate charge. That of the Second Class will be £1 5s. per week, subject to modification at the discretion of the Committee.

The Rules of the Institution—a copy of which will be furnished on application to the Superintendent—have received the sanction of the Home Secretary and of the Commissioners in Lunacy.

Cases of great emergency will be received immediately, *on being brought with the legal forms duly filled up. These are always indispensable.*

Where the case is not very urgent, previous notice of a day or two, with particulars, would facilitate any special arrangement that might be required for the reception of the Patient.

The beneficial influence of appropriate management in the incipient stages of mental disease, as affecting the probability of cure, is now so fully recognised that it seems hardly necessary to urge the early removal of persons so afflicted to this or some similar Institution, and the Committee have the satisfaction of stating, that of the number of those admitted since the opening of this Hospital, a large proportion have already been discharged in consequence of their mental restoration.

The Forms requisite for the admission of Patients will be immediately forwarded on application to the Superintendent.

By order of the Committee,

ALFRED J. WOOD, M.D., F.R.C.S.,

Resident Medical Superintendent.

Barnwood House, Gloucester, October, 1860.

ARDEN HOUSE, HENLEY IN ARDEN, WARWICKSHIRE.

A PRIVATE ASYLUM for the Cure and Care of a very limited number of persons of the Higher Classes labouring under Mental and Nervous Affections.

Arden House is centrally situated in one of the Midland Counties, in the vicinity of Birmingham and Leamington, Warwick, Kenilworth, and Stratford-upon-Avon—a neighbourhood rich in classic interest, as well as picturesque beauty. The House stands on elevated ground, in a peculiarly healthful locality. The pleasure-grounds, plantations, and gardens are very extensive and tastefully laid out; and there are no boundary walls or other objects calculated to impart a prison-like aspect to the mansion, which is simply that of a private Country gentleman.

Resident Proprietor, G. R. DARTWELL, M.R.C.S., Inspector-General of Army Hospitals, and lately Staff Surgeon Superintendent of the Royal Asylum for Military Lunatics. References and Testimonials of the most unexceptionable character.

For particulars, address the Proprietor.

BETHNALL HOUSE ASYLUM, CAMBRIDGE HEATH, LONDON, For Private Patients of Both Sexes.

This Asylum, though little more than two miles from the Royal Exchange, is bounded by six acres of Pleasure-ground for the use of its Inmates; whilst its proximity to Victoria-park and Epping Forest, to which the Patients are constantly taken (a Carriage being provided for their sole use), the advantages of a Town and Country life are combined. In addition, they have had the opportunity afforded them during the Autumn of the past two years of spending some time at the sea-side.

JOHN MILLAR, L.R.C.P. Edin., *Resident Medical Superintendent.*

DUNSTON-LODGE ASYLUM. ESTABLISHED IN 1830, FOR THE RECEPTION AND RECOVERY OF THE INSANE. (Provisional County Asylum for Cumberland and Westmoreland.)

DUNSTON LODGE is pleasantly situated, near the healthy and retired village of Whickham, in the county of Durham, and is of easy access from the Newcastle-upon-Tyne and Gateshead Railway Stations.

The House is spacious, and contains every domestic comfort, with perfect retirement. The buildings and pleasure-grounds for both sexes are separate and distinct from each other, and have been considerably enlarged, and will now permit a limited increase of Private Patients.

Billiards, Music, and other rational amusements are provided for those who may be prevented by the weather or other causes from taking more active out-door recreation; and for such as require Carriage or Horse Exercise both are always ready, with competent servants to attend upon them.

TERMS MODERATE, ACCORDING TO THE REQUIREMENTS OF EACH.

Proprietor and Superintendent Mr. C. GARBUTT.
Resident Physician Dr. GARBUTT.
Matrons..... Mrs. GARBUTT and Mrs. PILLING.

Medical Gentlemen and Clergymen are respectfully invited to visit the Asylum.

BROOM HOUSE, MANSFIELD, NOTTINGHAMSHIRE.

A PRIVATE ASYLUM FOR LADIES ONLY.

This Establishment, hitherto so successfully conducted by the late Booth Eddison, F.R.C.S., will in future be carried on by his Widow, with the assistance of an efficient Superintendent and a Medical Man in regular attendance.

Broom House is contiguous to the Mansfield Station of the Midland Railway, about 14 miles from Nottingham, and within easy distance of Chesterfield, Worksop, Southwell, and Alfreton. The House is commodious, and surrounded by several acres of Garden and Pleasure Ground, and is replete with every convenience for the classification of Patients of the higher and middle classes, every facility being afforded for carriage and garden exercise.

Mrs. BOOTH EDDISON is determined that nothing shall be wanting on her part to make this a first-rate Establishment, on terms to meet the requirements of the Patients.

For further particulars apply to Mrs. EDDISON; or to Miss STEVENSON, Resident Superintendent.

INSANITY.

CHURCH-STREET, EPSOM.

Mr. STILWELL, Surgeon, has a vacancy in his private house for a Lady who may be suffering under any mild form of Mental or Nervous Disorder.

The Inmates in Mr. STILWELL's house are immediately under the care of himself and family.

PRIVATE HOUSE OF RETIREMENT,

(FOR THE RECEPTION OF INSANE PERSONS OF BOTH SEXES),

DUNNINGTON HOUSE, NEAR YORK.

This Establishment is in a retired and healthy situation, about four miles from York. Its domestic comforts, Gardens, and Pleasure Grounds attached, render it equal to any other Establishment in the kingdom. The Patients are under the immediate superintendence of Mr. and Mrs. HORNBY, and partake of all the enjoyments of a domestic life. The amusements are varied and numerous. The Billiard Table and Bowling Green afford ample exercise for those whose unhappy situation renders walking or riding exercise from home improper. The house is attended by an eminent Surgeon, *but the friends of any Patient may make their own choice of a Medical adviser when occasion requires.* Patients attended from their own residences, travelling expenses only charged. The terms will vary according to the accommodation required.

RETREAT FOR MENTAL INVALIDS,

EARL'S-COURT HOUSE, OLD BROMPTON.

Ladies suffering from Mental and Nervous Disorders will find a most desirable home, with extensive Pleasure Grounds, an easy and convenient distance from London, where there is cheerful society, and every comfort and amusement studied, combined with the most approved modern system of medical and moral treatment.

Terms, regulated by the accommodation required, with full particulars, can be had of application, or forwarded by post, with the highest testimonials from the leading members on the Medical Profession and others.

PRIVATE ESTABLISHMENT FOR THE INSANE,

CHURCH STRETTON, NEAR SHREWSBURY.

This Establishment is conducted by the Resident Proprietor, Dr. S. G. BAKEWELL, son of the late Mr. Bakewell of Spring Vale, Staffordshire.

The Ladies occupy a separate residence, and are under the immediate care of Mrs. Bakewell.

The neighbourhood of Church Stretton is very picturesque, and its air is mild and bracing. Its similarity to Malvern is often noticed.

References can be given to Medical Gentlemen and others in Shrewsbury, Hereford, Birmingham, and throughout Staffordshire.

The Reports of the Commissioners in Lunacy and of the visiting Magistrates will be shown on personal application.

Church Stretton is a first-class station on the Shrewsbury and Hereford Railway, twelve miles from Shrewsbury.

DRIFFOLD HOUSE ASYLUM,

SUTTON COLDFIELD, WARWICKSHIRE.

Resident Proprietor—Geo. Bodington, L.R.C.P. Edin.

Established upwards of 50 Years.

The Proprietor objects to receive patients who are violent, noisy, or destructive. The Institution is especially adapted for the amelioration and cure of mild chronic cases, particularly of Ladies capable of domestic association. The Male Patients occupy a detached house. Carriage exercise provided. Patients have the unequalled privilege of exercising in an enclosed Park of about 3000 acres, including 500 acres of woodlands penetrated by charming ridings and glades, and diversified by several beautiful small lakes of water. The amusements of sporting and fishing are enjoyed by those capable of them. Here, duly attended, they wander about *ad libitum*, and the pure air and dry soil never fail to improve their general health.

Apply for "Forms of Admission" and Terms to the Proprietor.

DROITWICH ASYLUM,

Established in 1791.

Many and great improvements have taken place in this Establishment, and it is now licensed to Sir Charles Hastings, M.D., D.C.L., and Francis Pon Bennett, L.R.C.P. Ed., M.R.C.S. Eng., for the reception of private Patients only.

The Grounds are well arranged and extensive, which, combined with moderate charge for Board and Medical Attendance, and the great preponderance in the proportion of cures over that of mortality, render it an Establishment well suited for the recovery of the Insane.

The Terms and Forms of Certificates may be obtained on application to FRANCIS PON BENNETT, Resident Physician and Proprietor, Asylum, Droitwich.

DUDDSTON HALL,

BIRMINGHAM.

PRIVATE ASYLUM FOR MENTAL ALIENATION.

Within easy distance of Aston Hall and Park.

Under the Medical direction of the Resident Proprietor, Dr. BOISRAGON (son of the late Dr. Boistragon of Cheltenham), formerly Medical Superintendent of Private Asylums, and late Physician to the Cornwall County Asylum.

The House, situated in 13 acres of ground, with walled Gardens, Green and Hothouses, Plantations and Pleasure Grounds, is easily accessible by the Midland and South Staffordshire Railways.

**ELM HOUSE ASYLUM,
QUEEN'S ELM, BROMPTON, NEAR LONDON.**

ESTABLISHED BY MISS ELLIOTT, 1840.

Miss ELLIOTT continues to receive a limited number of Ladies mentally afflicted. The arrangements are conducted upon the plan of a private family, combining Medical and Moral treatment. The House and Grounds are pleasantly situated, and have been recently much enlarged and improved. Experienced Nurses sent to any part of the country.

WANTED, AN INVALID REQUIRING BOARD AND RESIDENCE, near the SEASIDE, under the SOUTH DOWNS. For particulars apply, by letter, to "MEDICUS," 19, Brompton-row, S.W.

**EASTERN COUNTIES ASYLUM FOR IDIOTS AND
IMBECILES,**

ESSEX HALL, COLCHESTER.

Chairman—Sir EDWARD C. KERRISON, Bart., M.P.

Vice-Chairman—Sir CHARLES R. ROWLEY, Bart.

Treasurer—JOHN BAWTREE, Esq.

This Institution was opened on July 1st, 1859, for the reception of Election Cases from the four Eastern Counties, and of Cases by payment from all parts of the kingdom. The Annual Subscriptions entitling to Votes at the half-yearly Elections commenced at 10s. 6d., and the Life Subscriptions at £5 5s.

The rates of admission by payment range from £25 to £50 per annum, according to the circumstances of the friends. If special accommodation be required, a higher rate is necessarily charged.

All the Banks in the Eastern Counties receive Subscriptions; also Messrs. HANKEY and Co, 7, Fenchurch-street, London, Agents to the Bankers of the Institution; Messrs. MILLS, BAWTREE, ERRINGTON and Co Colchester.

A Report of the Charity, and all particulars, may be obtained by applying to Mr. WM. MILLARD Superintendent, Essex Hall, Colchester.

TUE BROOK-VILLA, GREEN-LANE,

Situated about Three Miles from Liverpool.

Erected expressly for the care and cure of those invalids, of both sexes, whose mental afflictions render absence from home desirable and necessary.

This House is in the Italian style of Architecture, light and airy throughout: its various Corridors, Sitting and Bed-rooms, commanding extensive views from all the windows and from the Garden and Pleasure Grounds.

The internal arrangements are complete, where everything is combined, with the kindest care and attention, for the restoration of the unhappy invalids.

Mr. and Mrs. Owen have had upwards of twenty years' experience in the care and treatment of the Nervous, and those mentally afflicted.

The terms vary according to the circumstances and accommodation required. Experienced attendants sent to remove invalids if required.

**GROVE HOUSE ASYLUM,
ACOMB, NEAR YORK,**

Is pleasantly situated on an eminence commanding an extensive view of the surrounding country. It has a regular Medical Attendant, and the comfort of Patients is secured by the personal superintendence and management of Mr. and Mrs. PEARSON. Being situated within two miles of York, the Asylum is easily accessible. For Terms, apply to the Proprietor, Mr. PEARSON, Grove House, Acomb, York.

HADHAM PALACE, HERTS.

ESTABLISHED 60 YEARS.

A Private House for the reception of a limited number of Patients suffering under the milder forms of Mental Disorders. The Grounds are extensive; and from the absence of violent cases, the inmates are received as in a private family. A carriage or horses provided when required. For terms, apply to Dr. F. M. SMITH, *Resident Proprietor*.

HAYDOCK LODGE,

ASHTON-IN-MACKERFIELD, LANCASHIRE,

Two Miles from the Newton-Bridge Station, on the Manchester and Liverpool Railway.

ASYLUM FOR MENTAL AND NERVOUS COMPLAINTS

UNDER THE SUPERINTENDENCE OF MR. AND MRS. SUTTON.

Visiting Physician—F. RENAUD, Esq., M.D., Manchester.

Resident Medical Superintendent—H. ROOKE LEY, Esq.

Chaplain—The Rev. FRED. KENNEY, M.A.

This Mansion, pleasantly situated in an extensive Park about three miles in circumference, and lying in a retired district, midway between Liverpool and Manchester, possesses many natural advantages for the treatment and cure of persons afflicted with mental disorders. The soil is sandy, and lies on the red rock—a circumstance that implies freedom from humidity, and purity of water.

HAYDOCK LODGE having been built about sixty years ago as the country seat of an opulent gentleman, is arranged internally and externally so as to ensure a large amount of domestic comfort. The day rooms are large and lofty, and the sleeping apartments numerous and perfectly unexceptionable. Extensive lawns and woodlands surround the house, and a garden four acres in superficial area adjoins it. To these, as well as to the Park, patients have free access, under proper superintendence. There is also a farm of nearly sixty acres, upon which the gentlemen patients are very generally induced to employ themselves.

The alterations within the Mansion have been such only as were necessary to ensure domestic comfort and classification. Altogether the house resembles a large private residence, rather than a public institution.

Out-door exercise, as an occupation, forms an essential part of treatment when the weather is fair; and when the days are unpropitious, in-door amusements are substituted.

The religious wants of such of the inmates as are in a fit state are provided for by the vicar of the parish.

The highest medical and general references can be given, and further particulars, and Blank Forms of Certificates, may be had on application to the Superintendent, whether personally or by letter.

MENTAL AND NERVOUS AFFECTIONS.

HALLIFORD HOUSE, SUNBURY, MIDDLESEX.

This beautiful and secluded residence, standing in a small park of eighteen acres, and convenient of access, either by omnibus or railway, is appropriated to the reception of a limited number of patients suffering under the milder forms of Mental disorder. They have the advantage of the constant personal care and companionship of the Resident Physician and his family; and in all the arrangements relating to their domestic and moral management, great care is taken to avoid whatever may be calculated to remind patients of their circumstances necessitating their temporary separation from family and friends. They have also the advantage of cheerful society, carriage exercise, and a variety of amusements—chess, billiards, archery, &c.—and, in any case requiring it, a separate suite of apartments is available.

Terms and other particulars may be learned upon application to Dr. SEATON, the Resident Proprietor.

Dr. S. is at liberty to refer to several leading London Physicians—amongst others, to Dr. Roots.

HEIGHAM HALL RETREAT,

ASYLUM FOR THE CARE AND TREATMENT OF PRIVATE
PATIENTS, OF BOTH SEXES,

LABOURING UNDER NERVOUS AND MENTAL DISEASES.

Visiting Physician—W. H. RANKING, M.D. (Cantab.), Fellow of the Royal College of Physicians of London, and Senior Physician to the Norfolk and Norwich Hospital.

Visiting Surgeon—W. P. NICHOLS, F.R.C.S., (Exam.), Senior Surgeon to the Norfolk and Norwich Hospital, and Consulting Surgeon to the Bethel Hospital.

Resident Surgeon—J. F. WATSON, M.R.C.S. *Chaplain*—The Rev. W. BISHOP.

This Establishment has recently been greatly Enlarged and Improved, and is now complete in all the details most conducive to the successful Treatment of Mental Disease.

The following extracts are from the recent Reports of the Commissioners in Lunacy and the Visiting Justices:—

"Dec. 3rd, 1859.—We notice with pleasure that the Patients who have been removed from ——— were all more or less improved in appearance and demeanour, and many of them expressed themselves well pleased with the change. From 14 to 16 of the Patients, male and female, dine regularly at Mr. and Mrs. Watson's table,—an arrangement of which we highly approve.

"W. G. CAMPBELL, } *Commissioners in Lunacy.*
"J. GASKELL, }

"May 17th, 1860.—The effort made by the Proprietors to render this Establishment a Comfortable Home and Hospital for the cure of the mentally afflicted, appears to have been entirely successful. The important and extensive additions and alterations made during the past year are, in our opinion, very good. The entire building is lighted with gas—furnished and decorated in a superior manner, and wears altogether an air of cheerfulness which is very pleasing. We cannot conclude this report without mentioning the very apparent improvement in some of the Patients removed from another Establishment, and which we consider as affording strong proof of judicious management.

"S. S. BEARE, } *Visiting Justices.*
"EDWARD WILLETT, }
"C. M. GIBSON, F.R.C.S."

THE SCALE OF CHARGES IS ADAPTED TO THE MEANS AND REQUIREMENTS OF ALL
PATIENTS.

Application may be made to Mr. NICHOLS, Dr. RANKING, or Mr. WATSON, at the Retreat.

LIME TREE HOUSE,

ACOMB, YORK.

For the reception of a limited number of first-class patients of both sexes nervously and mentally afflicted, situate in a pleasant, healthy, and airy locality, two miles west of York; conducted by Mr. Nelson, Medical Proprietor.

This institution affords experienced medical treatment, security, privacy, and all the comforts of a home.

Billiards and other amusements suitable to the capabilities of the inmates will be provided.

Mrs. Nelson and family reside in the house.

MUNSTER HOUSE, NEAR FULHAM.

THREE MILES FROM HYDE-PARK CORNER.

For the Care and Recovery of Nervous, Epileptic, and Insane Gentlemen.

PROPRIETOR—MR. CYRUS ALEXANDER ELLIOTT, SURGEON,

Late of Cowper House, Old Brompton.

Established 1825, for Private Patients only.

MUNSTER HOUSE, once the Hunting Seat of his Majesty King Charles II., contains twenty-nine rooms, and is situated on the road from London to Fulham, in the highest and healthiest part of the parish, and upon a gravelly soil. The pleasure-grounds are eight acres, entirely walled in, ornamented with fountains and gold-fish, statuary and rock-work, terraces and parterres, conservatories and summer-houses, and studded with noble trees and flowering shrubs; the whole offering most cheerful inducements for recreation, exercise, and amusement, which consists of a Bowling-green and Bowling-alley, Billiard and Reading-rooms, with Newspapers, Periodicals, and Musical Instruments, and a Library well stored with books.

This Establishment has the advantage of being near to London, and yet as rural as any of our country villages. It is easy of access for professional and other visits by the Putney Omnibuses every ten minutes from the Bank and London-bridge Railway Station. It is also within a short distance of the Victoria Station, Pimlico, the Wandsworth Station on the South Western, and the Putney Station upon the Windsor lines of Railway.

The Proprietor has a farm a short distance from London, where apartments can be obtained for the treatment of a case not admissible into an asylum.

Nurses and Attendants can be immediately obtained.

EFFRA HALL, NEAR THE CHURCH, BRIXTON.

THREE MILES FROM THE BRIDGES.

For the Care and Recovery of Nervous, Epileptic, and Insane Ladies.

**Established at Cowper House, Old Brompton, 1825, for
Private Female Patients only.**

PROPRIETOR—MR. CYRUS ALEXANDER ELLIOTT.

The House, surrounded by its Lawn, walled-in Gardens, Meadow, and Orchard of five acres, has long been admitted to be one of the most beautiful and secluded residences in this well-known healthy locality, proverbial for its pleasant walks and varied scenery. The greatest care has been taken to render this an Establishment for Recovery and a Domestic Home, rather than an Asylum in the general acceptance of the term; and being exclusively for the reception of Females, a greater extent of liberty and recreation is available than can possibly be obtained in houses where both sexes are admitted.

The Faculty and the friends of patients are invited to view, in Effra Hall and Munster House, the arrangements expressly made for the various forms of Mental Disease, which have by experience been found to assist so materially the Medical and Moral Treatment, by affording Classification to the Insane, Quietude to the Nervous, and to the Epileptic those accommodations which are so particularly required. The number of recoveries in these Establishments has not been exceeded by any others, and restraint is not nor has been used in any case.

Those patients whose cases permit are allowed (accompanied) to walk and ride into the country, and attend Divine Worship; and if change of air is considered requisite, will, by the request of their friends, be sent to the sea-coast. The Proprietor has a cottage always in readiness for a case not admissible into an asylum.

Omnibuses pass Effra Hall every five minutes from the City and Oxford-street.

The Terms are from ONE and HALF GUINEA per week.

For Attendants, apply to WARREN H. DIAMOND, M.D., M.R.C.S., and L.S.A., Medical Superintendent, as above, or to Munster House; and to W. V. PETTIGREW, M.D., F.R.C.S. of England, 7, Chester-street, Grosvenor-place.

This Institution is established for the treatment of Surgical Diseases peculiar to women. It contains twenty beds. A small sum is paid by each patient, weekly, towards the expense of the Institution, the services of the medical officers being entirely honorary. All qualified medical men are admitted to see the practice on Thursdays, at 2 P.M., on application to one of the medical officers at "The Home."

PRIVATE INSTITUTION FOR THE TREATMENT OF THE INSANE,

SANDYWELL PARK, NEAR CHELTENHAM, GLOUCESTERSHIRE.

Conducted by Dr. HITCH and Mr. J. YORKE WOOD.

SANDYWELL PARK has been long known as one of the most admired and healthful residences in the county of Gloucester. The Mansion is situated in a finely-timbered Park of 120 acres in extent, with Gardens, Plantations, and a Farm attached to it. It is on the Cotswold Hills, overlooking the Vale of the Severn, amidst varied and beautiful scenery; and though only five miles from Cheltenham, is perfectly secluded, and affords every facility of access without publicity.

The Mansion has been much improved and considerably enlarged, and by means of additional buildings has been made to consist of two houses attached to each other, effecting not only a separate residence for the two sexes, but a complete classification of Patients, with accommodations for either sex, on any required scale; whilst the arrangements are such as to afford separation or social intercourse, according to the varied condition of each invalid, or the wishes of the relatives or friends.

This Institution, therefore, possesses all the requisites for the successful treatment of every form of mental disorder. It embraces the means of domestic quiet, privacy, and security from observation, without close confinement; facility for exercise of all kinds in the open air, and of amusements within doors, suited to the wants as well as to the tastes and habits of the invalid; and as the Physician and his family reside in the house, and live with the Patients, the Establishment assimilates itself to that of a country gentleman, with this advantage, that it combines the solace of domestic life and the benefits of social communion with the indispensable watchfulness of the *medical* eye.

There are also separate houses on the estate for those Patients whose friends wish them to avoid association with others.

A Chaplain is also attached to the Establishment.

The Commissioners in Lunacy report, at their visit in March, 1848, "That the arrangements appear to be extremely judicious, and that altogether they have never seen any Private Establishment with which, in point of situation, construction, and means of varied exercise and amusements, they have had greater reason to be satisfied."

For any other particulars, or for terms (which will depend on the accommodations required), applications made to Dr. HITCH, Sandywell Park, near Cheltenham, will receive every attention.

Secretary—Robert Freeman, Esq.

Assistant Secretary and Collector—Mr. Herbert Williams.

Bankers—Messrs. Goslings and Sharpe.

THE MEDICAL PROFESSION, at the suggestion of an old and valued Member, have endeavoured to found an Asylum for those of their Brethren who, from ill health, want of success, or other adverse influences, have sunk into poverty, and for the Widows of Medical Men in reduced circumstances; with this is combined a School, devoted, in part, to the gratuitous education of Orphans of Medical Men. The purposes are as follows:—

FIRST,—To maintain an Asylum, in which 100 Pensioners, who must be duly qualified Medical Men, or their Widows, not under 50 years of age (possessing incomes of at least £15 and not more than £60 a year), shall be provided with three furnished rooms each, and with such additional assistance and accommodation as the funds may permit.

SECONDLY,—To provide a School, in which a liberal education will be given to 200 boys, the Sons of duly qualified Medical Men; forty of whom will be educated, boarded, clothed, and maintained entirely at the expense of the Institution, while the remainder will be charged at the lowest rate which is found to be practicable.

THIRDLY,—To grant Annuities, or occasional pecuniary assistance to distressed Members of the Medical Profession or their families, when they can be granted without detriment to the Asylum or School, which are to be ever regarded as the principal objects of the College.

There is a Chapel for Divine worship, according to the ritual of the Church of England.

The "Royal Medical Benevolent College" was first projected in 1851. In the latter part of 1852, subscriptions to a large amount having been received, a site was obtained at Epsom, and on the 6th of July, 1853, the first stone of the College was laid by the Right Hon. the EARL MANVERS, President of the College, in the name of H.R.H. the PRINCE CONSORT, who was prevented by indisposition from being present. On the 25th of June, 1855, the Institution was formally opened by H.R.H. the PRINCE CONSORT, accompanied by H.R.H. the PRINCE OF WALES, and was shortly afterwards occupied by the Pensioners and Scholars who had been elected. On the 14th of July, 1857, the Chapel, the funds for which were provided by a special subscription among the Ladies, was opened by the LORD BISHOP OF WINCHESTER.

That portion of the Building which is destined for the School is so far completed as to accommodate one hundred and fifty boys; but only five Pensioners' Houses, containing twenty residences, have yet been built. There are at the College twenty Pensioners, forty Foundation Scholars, one hundred and ten Exhibitioners, and some Day Scholars. No more Pensioners can be admitted until the increase of the funds belonging to the College will permit the erection of additional Pensioners' Houses.

Donors of TEN GUINEAS are Life Governors of the College; Subscribers of ONE GUINEA Annually are Governors during the continuance of their Subscriptions. All Subscriptions are due in advance on the 1st of January in each year, and must be paid before the elections in order to entitle Governors to vote.

The Governors vote at all elections by ballot, either personally or by proxy, and have votes in the proportion of one for each GUINEA subscribed annually, for every TEN GUINEAS given, for every TWENTY GUINEAS collected.

Any information with regard to the details of the Institution will gladly be communicated to parties addressing inquiries to the SECRETARY, at the Office of the College, 37, SOHO-SQUARE, by whom Subscriptions and Donations will be thankfully received. Subscriptions will also be received by the TREASURER, the MEMBERS OF THE COUNCIL, the HONORARY LOCAL SECRETARIES, and the BANKERS, Messrs. Goslings and Sharpe, 19, Fleet Street. Post Office Orders should be drawn on the Chief Office, "London, E.C." and made payable to "Robert Freeman."

The Office is open daily from Ten to Five, except on Saturdays, when it closes at Two o'Clock.

BEWARE OF SPURIOUS COMPOUNDS AND BASE IMITATIONS OF

A name invented and specifically applied to his invaluable discovery and none other; and is so wonderfully successful in treating disease as to create universal amazement throughout the Medical World. Paradoxical as it may seem, it produces *Sedative* and *Stimulating* properties *per se*, allaying inflammatory, febrile, nervous, or arterial action in the most positive manner on the one hand, while it arouses depression of nervous action or its sequelæ on the other, by seemingly affording nutrimenta for its requirement. And this will be better comprehended when its Therapeutic action is understood essentially to contain *Sedative*, *Anodyne*, *Diaphoretic*, *Astringent*, *Stimulant*, *Antispasmodic* and *Antiseptic* properties; attributes not possessed by any other property, and altogether differing from Opium or its varieties.

Extracts of Select Medical Opinions.

From J. M'GRIGOR CROFT, M.D., M.R.C.P., London,
late Staff-Surgeon to H.M.F.—November 26, 1859.

"Sir,—After prescribing Dr. J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic Douleureux, I feel that I am in a position to testify to its valuable effects. Really, in some cases, it acted as a charm when all other means had failed. Without being asked for this report, I must come forward and state my candid opinion that it is a most valuable medicine, and I have recommended several Chemists in this neighbourhood not to be without it for prescriptions."

From R. CROTHERS, M.D., Surgeon Royal Tyrone
Artillery.

"For some months past I have been using Dr. J. Collis Browne's Chlorodyne, and have been much pleased with its action as a sedative and antispasmodic."

From G. GIBBONS, M.D., Army Medical Depôt,
Calcutta.—May 15, 1858.

"I have much pleasure in bearing testimony to the efficacy of Dr. J. Collis Browne's Chlorodyne, having suffered very severely for a week from Diarrhœa. Two doses completely cured me, without causing the depression which is invariably caused by opiates."

From "THE BRITISH AMERICAN JOURNAL."

"From what we have seen of its effects (Dr. Collis Browne's Chlorodyne), we must say that it is a very valuable Anodyne, and in many respects for internal administration superior to any of the ingredients which, according to the 'Chemist and Druggist,' are said to enter into its composition. We have no doubt that Dr. Browne placed the formula in the hands of Mr. J. T. Davenport, 'the sole agent and manufacturer from the first.'"

From "THE MEDICAL TIMES."

"TO THE EDITOR OF THE MEDICAL TIMES AND
GAZETTE."

"Sir,—In reply to an inquiry made by your correspondent, who subscribes himself 'Nota Bene,' whether any cases of benefit from 'Chlorodyne' have come to the knowledge of your readers, I beg to say that I have been greatly pleased at the results in a case of severe pain in the hip-joint and in the vertebrae of the neck, which came on in a man long subject to chronic rheumatism, attended with permanent enlargement of the knees, ankles, and one of the wrists. He could not tolerate Opium, Hyoscyamus, or Belladonna, and in despair almost I gave him a prescription for a mixture of Chlorodyne in water, the dose being twelve minims. He took only two doses, which acted so well that he compared his feelings to being transported to Paradise. The effects lasted for several days. Whenever his pains return, he now takes a dose at bedtime, feeling secure of an escape for some days from suffering. I have also applied it locally, with good results, but in too few cases to report much upon it. It produces a certain amount of warmth and perspiration, with a remarkably soothing state of mind, as well as arresting the pain. No headache or other unpleasant symptoms followed its administration."

"THOMAS A. HENDERSON, M.D., L.R.C.P.,

"Physician to the Ramsgate Infirmary.
"The Vale, Ramsgate, September 23, 1857."

From JAS. T. O. JOHNSTON, M.D., Staff-Surgeon
Major, Principal Medical Officer to the General
Hospital, Parkhurst, Isle of Wight.—September
6, 1860.

"Sir,—I have much pleasure in bearing testimony to the valuable effects of Dr. J. Collis Browne's Chlorodyne. I have used it for the last six years, and found it most useful as a sedative and antispasmodic. In many cases of advanced phthisis it has been of marked service in allaying the cough, and producing tranquillity without any of the unpleasant symptoms which generally follow the use of opium. I have also found it very useful in cases of *delirium tremens* and severe cases of neuralgia."

IMPORTANT TO MEDICAL PRACTITIONERS.

THE GENUINE DR. JAMES' FEVER POWDER.

MESSRS. NEWBERY,

(whose great grandfather was partner and co-patentee with the late Dr. James) who have sold it uninterruptedly since its introduction in A.D. 1746, continue to prepare the above

From the only Recipe existing under Dr. James' Hand,

And beg the Profession always to prescribe it as "*Pulvis Jacobi ver. Newbery's*," that they may not be disappointed in the effect of their Recipes by the substitution of imitations which have neither the mildness nor certainty of Messrs. Newbery's James' Powder; and as the dose of these fictitious articles is the same as that of the ordinary *Pulv. Antimonialis* of the *Pharmacopœia*, it is very evident the articles have none of those peculiar characteristics which made Dr. James' Powder so renowned from its peculiar efficacy.

It is of the utmost importance therefore that the Profession should be made aware of this system of substitution; that they should make sure that in prescriptions the true James' Powder is used. This may be secured by the Profession ordering, as Dr. Tweedie has indicated in the *Lumleian Lectures on Fever*, published in the *Lancet*, giving NEWBERY's name in addition to the article ordered. This will prevent disappointment in its exhibition.

If doubt arise in the mind of any Practitioner as to the *original proprietorship*, and our close interest in it, we shall be glad to furnish irrefragable proof that we are the original consignees of the formula. Our grandfather and great grandfather were associated with Dr. James as partners in the commercial interest, and to the latter was left the charge (as executor) of making the Powder by Dr. James himself, as may be seen from an affidavit in our possession. We have a copy of the *Whitehall Evening Post*, July 12 to 14, A.D. 1748, in which appears one of the earliest announcements, it identifies the Fever Powder with our house at this early date.

We direct attention to the paper by the late John Cheyne, M.D., F.R.S.E., M.R.I.A., Physician to the Hardwicke Fever Hospital, Dublin, and Physician-General to His Majesty's Forces in Ireland, in the first volume of the *Dublin Hospital Reports*, page 315.

The following occurs in the *Lumleian Lectures*, delivered before the College of Physicians, session '58, '59, by Dr. Alexander Tweedie, Physician to the London Fever Hospital:—

"If the febrile excitement be such as to require antimonial preparations, a pill containing 2 or 3 grains of James' Powder (*prepared by Newbery*) should be taken at intervals according to circumstances."—*The Lancet*, 16th June, 1860, p. 590.

The following letter has been also received:—

46, Lower Brook Street, London,
8th February, 1860.

DEAR SIRS,

I ought long ago to have acknowledged and thanked you for sending me a specimen of James' Powder—a remedy I am constantly in the habit of prescribing, and wish that your preparation were always used.

I consider it a most valuable medicine in all cases for which antimony is suitable.

I am, dear Sirs,

Yours faithfully,

Messrs. Newbery and Sons,
St. Paul's Church Yard.

(Signed)

A. TWEEDIE.

For Varicose Veins, Weak, Swollen, or Dropsical Affections,
Accident to the Knee Joint, Increase of the Synovial Fluid,
and in all Rheumatic and Gouty Affections.

J. AND E. BRADSHAW beg particularly to call the attention of the Profession to the improvements they have made in the above articles, whereby all the objections hitherto existing have been overcome.

J. and E. B. have likewise made arrangements for the manufacture of all Surgical Bandages in India-rubber, vulcanized on a principle whereby the elasticity is preserved and not affected by climate, the Bandages being all made from patterns taken from each particular case. A perfect fit is secured thereby, preventing the many evils arising from undue pressure being applied to any part, which must always be the case providing the Bandage is not adapted to each particular case.

Prices, which will be found as low as other makers', notwithstanding the advantages offered, together with directions for measurement, will be sent on application, per return of post.

TO PHYSICIANS, SURGEONS, AND DRUGGISTS.

BROWN'S CANTHARIDINE BLISTERING TISSUE, prepared from pure Cantharidine. An elegant preparation, vesicating in much less time than the Emp. Lyttae, P.L., easily applied and removed, and will not produce strangury, or troublesome after-sores. It has received the sanction and commendation of many of the most eminent Practitioners in the Kingdom. In Tin Cases, containing ten feet, 6s. 6d.; and small Cases of five square feet, 3s. 6d. each.

BROWN'S TISSUE DRESSING, an elegant, economical, and cleanly substitute for all ointments as a dressing for Blisters, and may be called a companion to the above. In Tin Cases, containing twelve square feet, 1s. 6d. each.

Extracts and Editorial Note from the "New York Journal of Medicine."

"March 1, 1850.

"**BROWN'S CANTHARIDINE TISSUE**.—It presents peculiar claims to our notice in the inflammatory diseases of females and children, in whom the unpleasant consequences which so often follow the application of the Emp. Cantharides are most apt to occur. We have found it a reliable and peculiarly safe vesicant, and from the many trials we have given it, we are satisfied that it deserves the attention of the Medical Profession.

"Accompanying this article is a very simple and neat dressing."

"I have prescribed the Cantharidine Tissue and Dressing (as prepared by you), for the last ten years. I have much satisfaction in bearing testimony to its effectual, mild, and safe action as a vesicant on the most delicate skin, and one of the best auxiliaries in the successful treatment of congestive and inflammatory diseases; the dressing has the advantage of being cleanly, agreeable, and curative in its application.

FRANCIS L. PUCKRIDGE,

Sole Inventor and Manufacturer of the late Mr. R. Liston's

WATERPROOF TRANSPARENT ISINGLASS MEMBRANE PLASTERS.

Now patronized by Mr. Liston's successor, Mr. Quain, in his hospital and private practice; patronized likewise by Mr. W. Fergusson, Surgeon of King's College Hospital, Mr. J. M. Arnott and Mr. Wormald, of Bartholomew's Hospital. Used for Amputations and other serious wounds requiring observation without exposure to the air.

F. L. P. begs to state there are two qualities, and it is particularly beneficial for Spinal complaints, Ruptures, or any weakened part; likewise for Burns or Scalds, will remove the pain in a very short time. Also, a defensive Skin, to apply between the wound and the lint, and causes less pain in dressing. Likewise a superior Gauze Lisse, of the same adhesive properties as the Membrane. Also, superior Tinted Court Plasters, and Tinted Gold-beater's Skin, by the yard and in cases.

F. L. P. offers his most grateful thanks for the encouragement and kind patronage he has received from the Medical Gentlemen of England and foreign parts, and hopes to merit a continuance of their favours by manufacturing his Plasters with the same unremitting care as heretofore.

F. L. P. begs particularly to introduce to the surgeon-dentist, for tender gums, a delicate Plaster, that will adhere to the gold or ivory, and at the same time heal and protect the gums from pressure.

May be had of the Proprietor, 4, York-place, Walworth-road, Surgical Instrument-maker, Chemist, &c., with improved directions how to apply.

DR. ARNOTT'S HYDROSTATIC, OR FLOATING BED.

In the manufacture of this Bed great improvements have been made, by which it is rendered much more durable, and less expensive. The present prices are—

No. 1.—Hydrostatic Bed, with Castors, &c.	£8 8 0
No. 2.—Ditto, plain	7 7 0

FOR HIRE.

No. 1.—First Month.....	1 15 0
„ Second and succeeding months.....	1 2 0
No. 2.—First Month.....	1 10 0
„ Second and succeeding Months	0 17 6

The hire of the Bed, with Waterproof Sheet and Carriage, to be paid in advance.

EDWARD SPENCER and CO. have published instructions for its use, which remove much of the inconvenience complained of in some cases, and suggests increased adaptation.

*** Dr. Arnott, the Inventor, has inspected the Beds manufactured by Edward Spencer and Co., and has expressed his approval of their construction and make.

THE ADJUSTING BED,

Recommended for Lunatic Patients, in such Cases where the Hydrostatic Bed cannot be used.—See Report of Commissioners, June 1847, page 486. Prices Four and Five Guineas.

THE LIFTING BED,

Is a Mechanical Arrangement by which the Patient may be raised to any level required, or placed in any position without any exertion to the Attendant. This Bed is particularly suitable in all cases of heavy and helpless Patients, who often suffer much from the efforts used to move them, which this contrivance entirely obviates. It forms a beautiful combination with the Hydrostatic Bed. Price Ten Guineas, and upwards.

THE BED SITTING SUPPORTER,

Is a simple contrivance, relieving the Spine of all the superincumbent weight of the head and shoulders, and thus enabling many a patient to sit up and read and write, who could not have done so else. It is found to be a great relief in all cases of weakness from long confinement to bed, or spinal affections. Price Two Guineas.

Waterproof Sheeting, for Beds and Hospital Use. Air and Water Beds and Cushions, of all sizes and descriptions.

18 and 19, Billiter-street, Fenchurch-street, London, E.C.

NOS. 1, 2, and 3, show J. ALDERMAN'S PATENT GRADUATING ELASTIC SPINAL and GENERAL INVALID COUCH, which is fitted up with two, three, or four distinct graduating actions, so that an invalid can be adjusted imperceptibly to any position without being touched by the nurse, and free from all pressure, that being avoided by his Elastic Ventilating Mattress and his Patent Elastic Adjusting Foundation; so that a patient cannot become bed-sore by long confinement.

No. 4, 4, is J. A.'s Improved Spinal and General Invalid Couch and Carriage. The Couch has three distinct movements, so that a patient can be placed in any position; it has also a Shifting Stand for the room, upon large easy castors, so that the invalid can be lifted with the Couch from its stand, placed upon the Carriage, and go out for an airing when required, without being touched.

No. 5, 5, is J. A.'s Patent Graduating Elastic Self-adjusting Invalid Chair. This Chair, like the Couch, is made to follow nature in every respect, as the back, the arms, the seat, and the leg-rest are made to work at the same time, so that not a muscle of the patient need be disturbed. The arms are also made to put on and off in an instant, so that the patient can get on and off from either side while the leg-rest is out.

No. 6 is J. A.'s improved Self-Propelling Chair, which renders an invalid perfectly independent, being able to run from room to room without any assistance.

No. 7 is J. A.'s improved Exercising Horse, which he fits upon a variety of ways, so as to give any amount of exercise.

No. 8, 8, is J. A.'s Patent Portable Equilibrium Carrying Chair, which enables an invalid however weighty, to be carried up and down stairs with perfect ease and safety; the Chair always adjusting itself, enables the two persons who carry to walk up and down stairs in the usual way, quite erect, with their arms straight down, which avoids any strain upon their muscles. It is also a perfect Easy Chair for the patient to sit in during the day, the carrying handles being made to hook on and off in an instant.

No. 9 is J. A.'s improved Four-wheel Albert Chair, fitted for hand or pony. The body is mounted upon C and under-springs behind, and easy elliptic springs in front, so that it makes a most elegant and easy carriage, free from all oscillation.

No. 10 is J. A.'s improved Four-wheel Brighton Chair, which is mounted upon C and under-springs, both back and front, together with his new wrought-iron perches or cranes, instead of the old-fashioned wood-perches. It is also fitted for hand or pony, and is the most elegant and easy carriage in use.

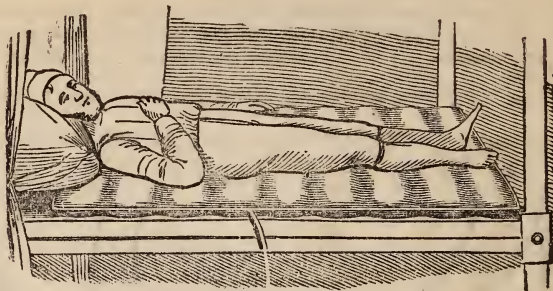

No. 11, 11, is J. A.'s improved Three-wheel Albert Chair, with and without a hood. It is elegant and easy.

No. 12 is J. A.'s improved Three-wheel Garden or Bath Chair, with or without a hood.
